

eSTAMP Part 4 Screen Shots

Eligibility Screener

A screenshot of a web-based eligibility screener. The background features a close-up of a young man with glasses. The page has a dark blue header with the text 'KNOW at HOME' in white, where 'at' is inside a white house icon. Below the header, the question 'Are you Eligible?' is displayed in white. A prominent red button with the word 'BEGIN' in white is centered below the question. A white text box contains a disclaimer about the public reporting burden of the information collection. At the bottom, a red navigation bar contains the links 'About', 'Privacy', and 'Contact Us' in white text.

KNOW at HOME

Are you Eligible?

[BEGIN](#)

Thank you for your interest in our study. First, we have a few questions to determine if you're eligible. Questions marked with an asterisk (*) are required questions that you must answer to move forward.

Public reporting burden of this collection of information is estimated to average 3 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer; 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; Attn: OMB-PRA (0920-XXXX)

Title: Evaluation of Rapid HIV Self-Testing among MSM in High Prevalence Cities

Principal Investigator: Patrick Sullivan, DVM PhD

Funding Sources: Emory University and MANILA Consulting Group, Inc. are conducting this study which is sponsored by the Centers for Disease Control and Prevention (CDC).

Introduction
You are invited to be in a research study. This study is being done by Emory University's Rollins School of Public Health. We expect to have up to 1000 men take part. If you decide to take part, the things we learn from you will help create better HIV prevention programs for our community.

[View](#) | [Save PDF](#)

Please check ONE of the following options:

- I am at least 18 years of age, agree to the above information and would like to participate in this research study.
- I would not like to continue as a participant in this research study.

We would like to freeze part of the dried blood spot specimen you send us for future use. Your samples would be stored for an indefinite time. We may use these specimens for research in the future. Nothing that could be linked to you will be kept with the specimens. Tests that might be done on these specimens may include tests for HIV, other viruses, or immune function tests (ability to fight infection). We will not test for genetic problems or use the specimens for cloning or commercial purposes. You may choose not to have your specimens stored for future research and still be part of this study.

Are you willing to have your specimens frozen for future use?

- Yes
- No

Thank you for reporting your rapid HIV home test results!

Please read the following important information about the results you reported. After that, you will be able to go to the token of appreciation information section and specify how you would like to receive your \$10 token of appreciation.

You have reported a preliminary positive result using at least one of the rapid tests. If this is the first time you have received a positive HIV result, it is important that you understand that this is only a preliminary result. You will need to go to a health care provider or an HIV counseling and testing center to be tested again. You might be feeling scared or intimidated, and might not know what all this really means. If you haven't done so already, we encourage you to call our study's toll-free number 1-866-728-1885 to talk to someone that will be able to help you sort things out and provide information on where to get tested.

You do not need to wait for the results from further HIV testing that will be conducted on your dried blood spot specimen. Please click on this link to get information on where to get counseling and additional testing at a location near you: www.aidsvu.org
