Assent Form and Information - Student Web Survey

Assent Page Text

Dear Students:

The Bloustein Center for Survey Research is using this survey to help assess a questionnaire that was developed to further understand what factors might lead to future substance use problems in students like you. These findings will help doctors and other health professionals with efforts to identify at-risk youths for the purposes of early intervention.

Your participation in this survey is completely voluntary and your individual survey responses will remain anonymous. Any use of the findings will not identify any participating schools or students. Only aggregate level data will be provided. Therefore, both school and student participation is considered anonymous.

The survey will take no more than 40 minutes to complete. It is important that every student take this opportunity to respond to the survey so that we will have enough information to determine how useful our survey is. Students can skip any question that they do not wish to answer. In addition, students can stop participating in the survey at any point.

For questions, you may call the Rutgers University, Office of Research and Sponsored Programs, Institutional Review Board, Sponsored Programs Administrator at 848-932-0150.

Thank you in advance for taking the time to participate in this survey.
