

The U.S. Geological Survey (USGS) is conducting a survey to gather input related to requirements and benefits for national enhanced hydrography data. This assessment is a partnership between the U.S. Geological Survey (USGS) and the Natural Resources Conservation Service. The information gathered during the survey will provide data that USGS can use to develop program alternatives for more effectively meeting multiple Federal, State, and other national business uses. The USGS is managing partner for the assessment and will be providing a final report to the Office of Management and Budget, the Federal Geographic Data Committee, and other officials and interested stakeholders.

You have been selected to participate in this survey because of your knowledge and use of hydrography data. We thank you in advance for participating in this survey. We estimate it may take 1 hour to complete the survey. The survey will be open from 1/9/2015 to 1/23/2015.

The results from the survey will be compiled and validated in follow-up interviews or workshops with selected managers and subject matter experts. You may also be asked to participate in those discussions.

Thank you for your time.
