## Overview

Office of Research staff within the Research, Analysis and Statistics organization provide calendar year projections of information and withholding documents (IRP) on an annual basis to accommodate more recent filing experiences. These IRP documents also incorporate current legislative and administrative initiatives, as well as relevant economic and demographic trends. Forecasts of economic/demographic data used to develop some of these projections are provided by IHS Global Inc.

The information and withholding document projections contained in this publication are used primarily by the IRS operational and resource planning functions to assist in the formulation of their budget submissions and staffing requirements, and to complete other analyses. Enacted tax law changes and confirmed administrative plans are reflected in these projections. However, legislative or administrative initiatives under consideration are generally not included due to the uncertain nature of their eventual outcome.

## Summary of Significant Trends and Revisions

A summary of the major trends and other significant factors embedded in the return forecasts for this edition of Publication 6961 are noted below.

For calendar year 2014, the grand total number of information and withholding documents projected in this update is about 1.1 percent (24.8 million forms) more than the total volume projected last year (see Table 1). A major portion of the net revision is driven by the increase in the projections of W-2 (i.e., 24.9 million more) and Form 1099-MISC (i.e., 12.8 million more). These upward revisions are in response to the actual CY 2012 and year-to-date (mid-July) CY 2013 filing experience.

For paper submissions of IRP documents, the CY 2014 estimate is about 10.7 percent (i.e., 4.9 million forms) more than the paper volumes projected in last year's update of this publication (Table 1, right side). Embedded in this net change for paper volumes is a decrease of approximately 0.8 million returns in the forecast of paper Form 1120-S Schedule K-1 and a 6.4 million increase for paper Form 1099-MISC. These results are also based on actual CY 2012 and year-to-date CY 2013 filing experience.

### Forms 3921 and 3922

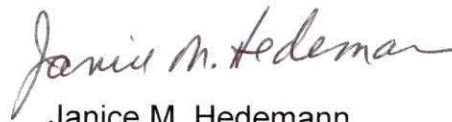

Two additional IRP forms have been added to the 2013 update of IRS Publication 6961. Form 3921 (Exercise of an Incentive Stock Option Under Section 422(b)) is used to report corporation's transfer of stock pursuant to an employee's exercise of an incentive stock option as described in Section 422(b). Form 3922 (Transfer of Stock Acquired Through an Employee Stock Purchase Plan Under Section 423(c)) is filed to report a transfer of stock by an employee where stock was acquired pursuant to the exercise of an option as described in Section 423(c).

## New FinCEN Filing System

The Financial Crimes Enforcement Network (FinCEN) mandated electronic filing of FinCen reports from casinos and other financial institutions starting on April 1, 2013. The new e-filing system no longer supports the old formats. Casinos and certain financial institutions that continue to file using the old format will fail to meet reporting requirements under the Bank Secrecy Act. The estimates developed in this update of Publication 6961 incorporate the marginal impacts of the e-file mandate on FinCen 103 and FinCen 104.

## Statement of Methodology

Three major sets of projections are included in this publication. Table 2 contains all media grand total projections for withholding and other IRP documents received by the IRS. Table 3 includes the paper portion and Table 4 includes the non-paper portion of the projections. All of these projections are at the U.S. level. In compliance with customer requests, Tables 5 A-D present projections of all paper documents, except Currency Transaction Reports (CTRs), for IRS processing campuses. CTRs are all processed by the Detroit Computing Center.

### Data Sources

Actual data on the volume of IRP documents filed are provided by program staff under the operating divisions and the Information Technology Services area. Data sources include: Martinsburg Computing Center (MCC) IRP Reformat Report (405-02-12), IRMF (Information Returns Master File) File Report (417-91-40), CAWR (Combined Annual Wage Reporting) W-2 Control Report, IRP Counts for 1099-SSA/RRB, Paper IRP Production Report from SCRIPS (Service Center Recognition Image Processing System), other campus sources, and the national calendar year Currency Transaction Report receipts. Counts for non-paper Form 1042-S were provided by relevant program staff. Non-paper counts of Foreign Information Returns were provided by operating division program staff.

### U.S. Level Forecasts

The U.S. level grand total (all media) projections were forecasted through a combination of time series extrapolations and regression analysis. Each form type was forecasted separately. In some instances, regression models were developed using appropriate economic/demographic variables. In other instances, forecasts for grand total volumes were built from historical time trends. Time trend models were used to forecast the paper IRP document volumes by form type. Projections of most IRP non-paper documents were then derived by subtracting the IRP paper documents from the grand total projections.

### Campus Level Forecasts

The Service Center Recognition Image Processing System (SCRIPS) enables IRS campuses to optically scan most paper IRP documents. As a result, the IRS has consolidated the filing/processing of most of these forms into two designated "SCRIPS" sites beginning CY 2007. Most paper documents will be processed at the Austin and Kansas City campuses. The paper Schedule K-1 series documents will be handled exclusively by the Cincinnati and Ogden campuses. Paper forms submitted from the International area will also be processed in Ogden.

The campus level forecasts were derived based on their relative shares of the U.S. totals in CY 2012 by applicable form type. These shares were held constant throughout the forecast horizon through 2021. In addition, all paper CTRs continue to be handled at the Detroit Computing Center.

Table 6 reflects the current processing campus alignment of states/international for paper Schedules K-1 and Form 1042-S. Table 7 shows the current alignment of states by processing campus for all other paper documents. Paper Forms 1098 and 1099 are being processed at the Austin and Kansas City service centers from January 2007.
