SECTION I, Part 2: **Competitive Preference Priorities (If Applicable)**

The 2012 VUB grant competition established two competitive preference priorities concerning data-based decision-making and productivity. Below, please indicate whether your project addressed the two competitive preference priorities. For each priority addressed, please complete the text boxes with concise information about implementation.

Enabling More Data-Based Decision-Making- Projects that are designed to collect (or obtain), analyze, and use high-quality and timely data, including data on program participant outcomes, in accordance with privacy requirements (as defined in this notice), in: (a) improving postsecondary student outcomes relating to enrollment, persistence, and completion and leading to career success, and (b) providing reliable and comprehensive information on the implementation of Department of Education programs, and participant outcomes in these programs, by using data from State longitudinal data systems or by obtaining data from reliable third-party sources.

1A. Not applicable

1B. Yes

If “Yes”, indicate below which data systems your project utilized.

State longitudinal data systems	Third-party data systems

Improving Productivity- Projects that are designed to significantly increase efficiency in the use of time, staff, money, or other resources while improving student learning or other educational outcomes (i.e., outcome per unit of resource). Such projects may include innovative and sustainable uses of technology, modification of school schedules and teacher compensation systems, use of open educational resources (as defined in the notice), or other strategies.
