TITLE OF INFORMATION COLLECTION:

Purchased Care Patient Satisfaction Online Survey

PURPOSE:

The overall purpose of the Purchased Care Patient Satisfaction Survey is to systematically obtain information from patients that can be used to identify problems or complaints that need attention and to improve the quality of purchased care services delivered to Veterans.

The resulting data will be used to demonstrate that VA is providing timely, high quality health care services to patients and to measure improvement toward the goal of matching or exceeding VHA internal benchmark performance.

DESCRIPTION OF RESPONDENTS:

The pool of respondents will consist of a monthly, random sample of Veterans who have received non-VA care within Veteran Integrated Service Networks (VISN) 8, 16, 20, and 23. The respondents will be contacted within 60 days of receiving the non-VA services.

The selection of your targeted respondents

1. Do you have a customer list or something similar that defines the universe of potential respondents and do you have a sampling plan for selecting from this universe?
 Yes No

If the answer is yes, please provide a description of both below (or attach the sampling plan)? If the answer is no, please provide a description of how you plan to identify your potential group of respondents and how you will select them?

Inclusion criteria:

- Sample size is fixed at each VISN by service
- Samples selected from all Veterans that received Purchased Care within 60 days of each monthly data extraction
- Veterans receiving a Purchased Care survey in the previous 12 months are excluded.

Sample size:

For each VISN a fixed number of 50 Purchased Care patients will be randomly selected from the available population in order to ensure sufficient representation in each VISN. In particular, the goal is to sample 100 patients per VISN, per month. The patient names, addresses, services received, dates of service, and scrambled social security numbers will be extracted from internal VA databases in accordance with existing approved standards ensuring privacy and security of the data. Note that the scrambled SSNs are used internally to help ensure multiple survey requests are not sent to a patient within a 12 month period.

In cases where there are fewer than 50 patients in a service to draw from, all available patients will be selected. For instance, if a VISN had 25 Purchased Care patients, then all 25 patients will be selected.
