TITLE OF INFORMATION COLLECTION:

Office of Public Health Environmental Exposure Newsletter Survey

PURPOSE:

The VA Office of Public Health (OPH) produces and mails a variety of newsletters focused on environmental exposures associated with deployment as one of several services to Veterans. This one-time survey is designed to improve the service delivery of these newsletters by collecting data on the usefulness of the information provided in the newsletters, preferred format for receiving the newsletters, and other sources Veterans use to obtain information on exposures. Given changing technology (social media, internet, email), this survey is essential in order to determine the appropriate format to provide this critical information to best serve the needs of Veterans and best use government resources.

DESCRIPTION OF RESPONDENTS:

Respondents will consist of Veterans who served in Vietnam, the Gulf War, OEF/OIF, or were exposed to ionizing radiation and are currently receiving one of four of the Office of Public Health’s newsletters (Agent Orange Review; Gulf War Veterans’ Illnesses, Operation Enduring Freedom/Operation Iraqi Freedom (OEF/OIF) Hazardous Exposures, and/or Ionizing Radiation Review. These Veterans consist of men and women, ages 18 and older, who have requested to receive one of the aforementioned newsletters.

Veterans will be selected randomly without replacement from each newsletter’s mailing list (4 strata). Based on previous studies of Veterans, we anticipate an overall response rate of 25%. The table below shows the number of Veterans on each mailing list, the number which will be sampled, and the anticipated number of respondents.
