**TITLE OF INFORMATION COLLECTION:**

**Nutrition and Food Services Customer Satisfaction Survey**

**PURPOSE:**

The VA Nutrition and Food Services Customer Satisfaction Survey is used to collect and evaluate the necessary information to determine whether improvements are needed to enhance the Veteran patient's nutritional therapy. All meals served to patients are an integral part of total Veteran patient therapy. This applies to regular as well as modified diets. Appropriate nutritional care can only be provided when food is actually consumed. Close monitoring of the patient's food intake is essential for the clinical dietitian to make comprehensive assessments with subsequent recommendations to the physician.

The survey is taken by Veteran patient category and/or location where the meal is eaten. When standards fall below the Veteran patient's expectations, there may be barriers, which interfere with patient food consumption. These barriers must be identified and Nutrition and Food Services will take actions, which are appropriate, and/or necessary to provide the patient with the food that meets acceptable service standards. Information obtained through this survey will have practical utility at all levels of the program to plan and redirect resources and efforts to improve or maintain a high quality of service. The survey will allow for continuous monitoring of changes and practices to ensure their sustainability focusing on optimal quality of care.
