The selection of your targeted respondents

1. Do you have a customer list or something similar that defines the universe of potential respondents and do you have a sampling plan for selecting from this universe?
 Yes No

If the answer is yes, please provide a description of both below (or attach the sampling plan)? If the answer is no, please provide a description of how you plan to identify your potential group of respondents and how you will select them?

VPS will not use a customer list to define potential respondents. VPS will push out the survey of 5-6 questions on a quarterly basis to the kiosk application. Random Systematic Sampling method will be utilized. (i.e. A simple example would be to select every 10th name that utilizes the kiosk (an 'every 10th' sample, also referred to as 'sampling with a skip of 10')). In addition, calculation follows basic boundaries below which are set up within the application prior to pushing out quarterly survey to application:

* Calculate the minimum required sample size to represent each site's population with a 95% confidence level and 4% margin of error.

* In addition, we add a buffer equivalent to the abandonment rate for that two week period to account for the possibility of patients abandoning on the survey page.

Administration of the Instrument

1. How will you collect the information? (Check all that apply)
 - Web-based or other forms of Social Media
 - Telephone
 - In-person
 - Mail
 - Other**, Explain

Veterans will complete the quarterly survey if using the VPS kiosk during check-in or performing other applications available at the kiosk (i.e., updating address information, requesting bene travel, etc)

The survey questions will be at the end of the session. Question scale will be either 1-5 (Likert Scale) or Yes/No responses.

2. Will interviewers or facilitators be used? [] Yes [x] No

Please make sure that all instruments, instructions, and scripts are submitted with the request.
