

Welcome to My Survey

The Department of Veterans Affairs is developing a mobile application that is intended to provide Veterans, caregivers and family members a repository of information about VA facilities. Some of the proposed features include but are not limited to VA facility's map, phone numbers, shuttle service information and frequently asked questions (FAQs).

The design team for the VA InfoApp would like your feedback on what features should be prioritized and what if any features that are not currently planned should also be included with the application and why.

The following questions will ask you to rate the value of certain proposed features and some of their characteristics. Just answer each question from your gut, there are no wrong answers. Please make use of the comment boxes to add additional comments and suggestions. You will also be presented with an opportunity to suggest and rate any features that you would like to see that were not mentioned.
