The Centers for Disease Control and Prevention (CDC), Office of Public Health Preparedness and Response (PHPR) has primary oversight and responsibility for all programs that comprise CDC's public health preparedness and response portfolio. Through an all-hazards approach to preparedness—focusing on threats from natural, biological, chemical, nuclear, and radiological events—PHPR helps the nation prepare for and respond to urgent threats to the public's health. PHPR carries out its mission by emphasizing accountability through performance, progress through public health science, and collaboration through partnerships. The PHPR Partner Program provides the opportunity for organizations to establish formal or informal relationships that can be mutually beneficial and ensure a healthy and safe nation.

A government-centric approach to national health security and resiliency falls short in meeting the challenges posted by a catastrophic incident. Furthermore, no one group, agency, organization or business owns the problems or has the resources to solve them. Recognizing this, PHPR seeks to more broadly engage partners to maximize resources and overall impact. In these challenging economic times, health security is a national challenge that calls for a national, whole community solution. Effective partnerships will overcome these challenges.

Please consider becoming a partner!

The information you provide is for internal purposes only and will not be shared outside of CDC.

Who can become a partner?

We welcome partnerships with external governmental and non-governmental organizations including non-profit organizations, trade associations, academic and research institutions, and the private sector. Our partners are representative of organizations, groups, and individuals.

Yes No May we contact you to follow up on your partnership interests?

Thank you for showing interest in becoming our partner. Once your information has been reviewed, it will be shared with the PHPR program that best fits your mission. You will be contacted as soon as possible.

Your contact information will be treated in a secure manner and will not be disclosed, unless otherwise compelled by law.

Public reporting burden of this collection of information is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-0996).
