

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30-Day 14-0770]

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call (404) 639-7570 or send an email to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC 20503 or by fax to (202) 395-5806. Written comments should be received within 30 days of this notice.

Proposed Project

National HIV Behavioral Surveillance System (NHBS)—(OMB No. 0920-0770, exp. 05/31/2014)—Extension—National Center for HIV, Hepatitis, STD, and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The purpose of this data collection is to monitor behaviors of persons at high risk for infection that are related to human immunodeficiency virus (HIV) transmission and prevention in United States.

The primary objectives of the NHBS system are to obtain data from samples of persons at risk to: (a) Describe the prevalence and trends in risk behaviors; (b) describe the prevalence of and trends in HIV testing and HIV infection; (c) describe the prevalence of and trends in use of HIV prevention services; (d) identify met and unmet needs for HIV prevention services in order to inform health departments, community-based organizations, community planning groups and other stakeholders. By describing and monitoring the HIV risk behaviors, HIV seroprevalence and incidence, and HIV prevention experiences of persons at highest risk for HIV infection, NHBS provides an important data source for evaluating progress towards national public health goals, such as reducing new infections, increasing the use of condoms, and targeting high risk groups.

The Centers for Disease Control and Prevention request approval for a 3-year extension of this information collection. Data are collected through anonymous, in-person interviews conducted with persons systematically selected from 25 Metropolitan Statistical Areas (MSAs) throughout the United States; these 25 MSAs were chosen based on having high AIDS prevalence. Persons at risk for HIV infection to be interviewed for NHBS include men who have sex with men (MSM), injecting drug users (IDUs), and heterosexuals at increased risk of HIV (HET). A brief screening interview will be used to determine eligibility for

participation in the behavioral assessment. The data from the behavioral assessment will provide (1) estimates of behavior related to the risk of HIV and other sexually transmitted diseases, (2) prior testing for HIV, and (3) use of HIV prevention services.

All persons interviewed will also be offered an HIV test and will participate in a pre-test counseling session. No other federal agency systematically collects this type of information from persons at risk for HIV infection. These data have substantial impact on prevention program development and monitoring at the local, state, and national levels.

CDC estimates that NHBS will involve, per year in each of the 25 MSAs, eligibility screening for 50 to 200 persons and eligibility screening plus the behavioral assessment with 500 eligible respondents, resulting in a total of 37,500 eligible survey respondents and 7,500 ineligible screened persons during a 3-year period. Data collection will rotate such that interviews will be conducted among one group per year: MSM in year 1, IDU in year 2, and HET in year 3. The type of data collected for each group will vary slightly due to different sampling methods and risk characteristics of the group.

Participation of respondents is voluntary and there is no cost to the respondents other than their time.

Total burden hours are 9,932.

ESTIMATE OF ANNUALIZED BURDEN HOURS

Respondent	Form	Number of respondents	Number of responses per respondent	Average burden per response (hours)
Persons Screened	Eligibility Screener	15,000	1	5/60
Eligible Participants:	Behavioral Assessment MSM	4,167	1	30/60
Eligible Participants:	Behavioral Assessment IDU	4,167	1	54/60
Eligible Participants:	Behavioral Assessment HET	4,167	1	39/60
Peer Recruiters:	Recruiter Debriefing	4,167	1	2/60

LeRoy Richardson,

Chief, Information Collection Review Office, Office of Scientific Integrity, Office of the Associate Director for Science, Office of the Director, Centers for Disease Control and Prevention.

[60Day-14-0591]

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on

proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404-639-7570 or send comments to LeRoy Richardson, 1600 Clifton Road, MS-D74, Atlanta, GA 30333 or send an email to omb@cdc.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including

whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Select Agent Distribution Activity (SADA): Request for Select Agent (OMB Control No. 0920-0591 exp. 7/31/2014)—Extension—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention is requesting approval to

continue data collection under the Select Agent Distribution Activity (SADA). The purpose of this data collection is to provide a systematic and consistent mechanism to review requests that come to CDC for Select Agents.

The term select agents is used to describe a limited group of viruses, bacteria, rickettsia, and toxins that have the potential for use as agents of bioterrorism, inflicting significant morbidity and mortality on susceptible populations. The SADA form is scheduled to expire on 07/31/2014.

SADA was originally created for the anticipated large number of requests for select agents by investigators seeking National Institutes of Health grants. The process was established to lessen the burden on CDC Subject Matter Experts (SMEs) who would be receiving requests for access to select agents housed within NCEZID.

The SADA application is a Material Transfer Agreement that is specific to select agent requests. Although the

SADA Office has not received a new application since the last Office of Management and Budget (OMB) request, they have received several inquiries and provided assistance to both internal SMEs as well as outside requestors. CDC has deposited a variety of strains into the Biodefense and Emerging Infections (BEI) Research Resources Repository and requestors now have the option of requesting materials using this mechanism. However, CDC would like to maintain the ability to process requests if they receive them and is, therefore, making a request to use the SADA application indefinitely.

The number of potential respondents in a given year is unknown. The estimates below are based on *if* they were to receive requests from 900 respondents. A user fee will be collected to recover costs for materials, handling and shipping (except for public health laboratories).

The cost to the respondent will vary based on which agent is requested.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)	Total burden (in hrs.)
Researcher	SADA Request for Select Agent	900	1	30/60	450
Total	450

[30 Day-14-0879]

Proposed Data Collections Submitted for Public Comment and Recommendations

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call (404) 639-7570 or send an

email to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC 20503 or by fax to (202) 395-5806. Written comments should be received within 30 days of this notice.

Proposed Project

Surveys of State, Tribal, Local, and Territorial (STLT) Governmental Agencies (OMB Control No. 0920-0879, Exp. 3/31/2014)—Revision—Office of the Director, Office of State, Tribal Local and Territorial Support (OSTLTS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

CDC's mission is to create the expertise, information, and tools that people and communities need to protect their health—through health promotion, prevention of disease, injury and disability, and preparedness for new health threats. CDC seeks to accomplish its mission by collaborating with partners throughout the nation and the world to: monitor health, detect and investigate health problems, conduct

research to enhance prevention, develop and advocate sound public health policies, implement prevention strategies, promote healthy behaviors, foster safe and healthful environments, and provide leadership and training.

CDC is requesting a three-year approval for a generic clearance to collect information related to domestic public health issues and services that affect and/or involve state, tribal, local and territorial (STLT) government entities. The respondent universe is comprised of STLT governmental staff or delegates acting on behalf of a STLT agency involved in the provision of essential public health services in the United States. The STLT agency is represented by state, tribal, local or territorial governmental entity or delegate with a task to protect and/or improve the public's health.

Information will be used to assess situational awareness of current public health emergencies; make decisions that affect planning, response and recovery activities of subsequent emergencies; fill CDC gaps in knowledge of programs and/or STLT governments that will
