¹ These are suggested targets. During recruitment and fielding we may adjust targets and cut points. For example, if 14-15 year olds have no problems with measures but 16-17 year olds have more issues with the measures, we may increase targets for 16-17 year olds (in current round and for future rounds). Additionally, if we recruit fewer Hispanic youth (for example) in round one, we may increase target for later rounds.

² FPL will be based on family size and determined during the screener interview.

³ N/A means there is no minimum or maximum recruitment target for this group; it does not mean this group is not eligible
