INSTRUCTIONS FOR QUESTIONNAIRE

To: Grantees receiving Lead Hazard Control funding

QuanTech has been tasked to obtain information about your experience conducting clearance testing on your Lead Hazard Control (LHC) grant. Please answer the questions provided in this Excel workbook based on your organization's experience during the last 12 months. If you have any questions, contact either Gary Dewalt, of QuanTech, the questionnaire contractor, at 610-255-5525 or Eugene Pinzer, of HUD's Office of Healthy Homes and Lead Hazard Control, at 202-402-7685. OMB Control No. xxxx-xxxx.

Software Requirements

This questionnaire contains a large number of macros and must be run using Excel 2007 or a more recent version of Excel. When the workbook (spreadsheet) is opened, you must give permission to allow the macros to be run if asked by your software. In addition, it is recommended that you do not have any other Excel workbooks open when using this spreadsheet!

General Information on How to Use this Questionnaire

This questionnaire is provided in an email to you and has been specifically configured for your Lead Hazard Control grant (number listed at the top left of this sheet). If the grant number shown is not one that you have, please contact Gary Dewalt for more instructions.

Two sets of questions are provided in this workbook. One set is a "general" question set containing 6 questions. The other set is a dwelling "unit-specific" set of 18 questions.

All questions are answered by clicking on buttons provided throughout this workbook. Direct entries into worksheet cells are not required nor recommended. You can change the answer to any question by simply going back and clicking the entry button for that question. However, keep in mind that doing so will remove your previous entry for that specific question and the question must be re-answered even if you decided not to change it after your re-clicked an entry button that already had an answer. The workbook is setup to display your data entries as you make them, so you will know immediately if this happens. This workbook has been pre-populated with up to a maximum of 20 dwelling unit addresses that you have reported as having been completed in OHLHC's Quarterly Progress Report System. In addition to answering the set of 6 general questions, to complete the questionnaire you must answer the same unit-specific set of 18 questions for each of these unit addresses.

INSTRUCTIONS FOR QUESTIONNAIRE

Before You Start

If you have not done so already, please save this questionnaire in a directory of your hard drive that is easily accessible to you and re-open it from that directory before answering any questions. We recommend not changing the name of the file as it has your grant ID embedded within the filename.

Saving the questionnaire

Buttons are provided to save a completed or partially completed questionnaire to your hard drive. These buttons will save the workbook in whatever directory the workbook was originally stored. When all the questions for all units have been answered, these save buttons will append a "_done" tag to the filename providing a clear indication that the file is ready to be emailed back to QuanTech.

Submitting a Completed Questionnaire

Attach the completed workbook to an email and email it to Gary Dewalt at fgdewalt@quantech.com

Preparing for Answering Questions

In order to help you prepare to answer the unit specific questions, a "Click here to print question sets" button is provided below so that you can preview the questions you will be answering in this workbook. Clicking this button will print the 2 question sets (one for general questions and one for unit-specific questions) to your default printer. The printed question set is NOT to be used as a markup sheet to submit your answers to QuanTech or HUD. It is only being provided for you to understand the types of information you need to pull from your records to make data entries into this workbook.

ANSWER UNIT-SPECIFIC QUESTIONS... <-Current Status

Please provide answers to unit-specific questions on the units listed below.

To print a list of these units, use the "Click here to print unit list" button. Clicking this button will print the address listing shown below to your default printer in a portrait format.

To answer the unit-specific questions for each unit listed in the table below, use the "Answer Unit Questions" button shown under "Questionnaire Access Control" in the row listing each unit address.
