and "MPRS_Lookup_DIBRS_Location" for detaile

tab, 1.Cover Letter, descripes the information in the following tab of this document.

Description

Report on the elements available for selection. Explaination of the report column heads appears below, titled Column Definitions.

Description

Name of Data Source

Ordinal Position of Table in Data Dictionary received from Source System-used internally

Name of the Table from which the data element is extracted from Source System

Ordinal Position of the data element in a Table in the Source System Data Dictionary-used internally

Name of the data element (please use the literal format as in the column)

Please note YES, NO or DI (De-Identification)for the element PII or HIPAA sensitivity. If the element is PII or HIPAA sensitive and will be de-identified, enter DI. A blank enter will be considered the same as a NO.

User has accepted this as a valid element for their use-drop down list-Yes or No

Date the data element requested in Spiral-2. This will help in revising your existing extract routines

This is the data type.

This is the Nullability condition

Indicator if data element is a primary key (PK) or foreign key (FK) in this table

Data Element Name

Dictionary meaning of the data element and enumerated values if applicable

Information on values the element may have

Notes concerning the element

Please add any comments that will help us understand the output extract.

Please add any comments on authoritativeness

This field is a concatenation of 4 fields supplied by COPS, containing information on certain lookup tables. The 4 fields are: Co Table Reference, Lookup Element/Primary Key, Lookup Value Element, and Lookup Value. These fields are separated by ";"s.

COPS_Lookup_Country", "COPS_Lookup_Grade_Rank", "COPS_Lookup_Offense","COPS_Lookup_States", "COPS_Lookup_U
ed information on these code tables.

	Yes	12/21/10	varchar(50)	NULL	

Notes

If type was SSN, this is the actual SSN

Installation for which law enforcement officer works. USAPHC is interested in generic location of where violation occurred, ie the specific Fort

Date of the violation

Lookup table associated. - Closed, Dismissed, Failure to appear, Ticket paid, others

Y/N value

Indicates fatal, vehicle/vehicle, fixed object, etc. Look up table.

Indicates privileges revoked. Can revoke different types of privileges. Revocation ID links to another table with additoinal information - reason why revoked, effective date, time of revocation, reinsteatement. A revocation is based on a violation, whereas a barring is more likely based on something lesser that may not be a crime, where revocation is based on a moving violation. USAPHC is not interested in details of the revocation, just need to know it occured. Assuming that is indicated in disposition.

Two types - 1408 (warning) CVB (federal magistrate ticket)

Helps define what the grade id is. Categories are Army, Navy, Coast Guard, etc. Then grade is the grades in that category. IE grade is O1, rank is LT.

Will need to collapse grade similar to the rank at ADCF for STARRS

UIC Number

Spells out UIC

This distinguishes whether it's a Motorcylce/Moped, Car, etc.

adjudication_cmdr_action_id is just a number, COPS will provide the data field cmdr_action_desc_txt instead. This will have the actual description of the Commander Action

Dollar amount. If commander gave the soldier a fine, the disposition would be Paid, whether commander or judge required it.

A 1408 is a warning, they are instructed to id it as that. So this is a yes/no.

The matching field that we have in our database in court_fine_txt.

If part of an MPR case, this is the link to the MPR. If USAPHC and STARRS currently getting the MPR number, this could be useful.

FDM Comments	ADS Comment	Code Table Reference

Subject organization is a common field for the various people tracked in the system and refers to the group that provides administrative support to person.
Examples are: 18th Airborne Corp, 42nd MP Company

This is a text field that will contain entries like 'Letter of Reprimand', 'Article 15', 'Verbal Counseling', etc. The name will be changed to adjudication_cmdr_action.

Warning Code - Yes/No field indicating whether a warning was issued or not

Yes/No field indicating whether there was personal injury involved in the accident.

This is the fine imposed by the court and is in addition to any other fines that may have been assessed. Court fines are based on state and federal violations, and adjudication fines are assessed by the commander based on the UCMJ.

If an MPR has been created for the violation, this is the reference number to access it.
