tab, 1.Cover Letter, describes the information in tab 2 of this document.

Description

Report on the attributes available for selection. Explanation of the report column heads appears below, titled Column Definitions.

Description

Name of Data Source

Ordinal Position of Table in Data Dictionary received from Source System-used internally

Name of the Table from which the data element is extracted from Source System

Ordinal Position of the data element in a Table in the Source System Data Dictionary-used internally

Name of the data element (please use the literal format as in the column)

Please note YES, NO or DI (De-Identification)for the element PII or HIPAA sensitivity. If the element is PII or HIPAA sensitive and it will be de-identified, enter DI. A blank enter will be considered the same as a NO.

User has accepted this as a valid element for their use-drop down list-Yes or No

Date the data element requested in Spiral-2. This will help in revising your existing extract routines

This is the data type.

This is the Nullability condition

Indicator if data element is a primary key (PK) or foreign key (FK) in this table

Data Element Name

Dictionary meaning of the data element and enumerated values if applicable

Information on values the element may have

Notes concerning the element

Please add any comments that will help us understand the output extract.

Please add any comments on authoritativeness

Reference to code table.
