This tab, 1.Cover Letter, descripes the information in tab 2.DAMIS-CHPPM Atr

Description

Summary report of the number of attributes that are in each of the 6 tables.

Report on the attributes that NIMH can selected. Explaination of the report column heads appears below, titled Column Definitions.

Description
Name of Data Source
Ordinal Position of Table in Data Dictionary received from Source System-used internally
Name of the Table from which the data element is extracted from Source System
Ordinal Position of the data element in a Table in the Source System Data Dictionary-used internally
Name of the data element (please use the literal format as in the column)
CHPPM has accepted this as a valid element for their use-drop down list-Yes or No
Date the data elements requested in Spiral-2. This will help in revising your existing extract routines
This is the data type and not populated at this time. It will be whatever you have in the source Tables
This is the Nullability condition and not populated at this time. It will be determined when your extract is received
Indicator if data element is a primary key (PK) or foreign key (FK) in this table
Data Element Name
Dictionary meaning of the data element and enumerated values if applicable
Values the attribute can have
Please add any comments that will help us understand the output extract.
Please note YES or NO if the element is PII or HIPPA sensitive for de-identification
Please add any comments on authoritativeness
