

Request for Approval under the “Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery” (OMB Control Number: 2120-0746)

TITLE OF INFORMATION COLLECTION:

FAA External Data Access Initiative (EDAI) IdeaScale Ideation Tool

PURPOSE:

The FAA Administrator recently launched an effort called the External Data Access Initiative (EDAI). The initiative will result in the release of FAA data to the public / private-industry to spur the development of innovative applications that advance the aviation industry.

As the first step in EDAI, we want to understand what types of data the public/private industry would like to receive. We want to make a ideation platform available for stakeholders to discuss their suggestions in a virtual forum.

The ideation platform will be built in IdeaScale, a tool that FAA has purchased a license to use. It asks questions about what new data stakeholders would like to receive in the future, and allows for them to discuss their responses (similar to IdeaHub, but available to external stakeholders).

DESCRIPTION OF RESPONDENTS:

We will share our IdeaScale website link with our list of approximately 120 known stakeholders (people who use FAA data today), and we will also promote the link on our EDAI website on faa.gov.

We expect ideation participants to be either executives or data managers from aviation software companies.
