PART I.—GENERAL INFORMATION

Background. This proceeding was instituted in response to a petition filed on May 29, 2014, by Mid Continent Nail Corporation (Poplar Bluff, MO). Antidumping and/or countervailing duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce makes an affirmative determination of dumping and/or subsidization. Questionnaires and other information pertinent to this proceeding are available at http://www.usitc.gov/investigations/701731/2014/certain_steel_nails_korea_malaysia_oman_taiwan_and_final.htm.

Certain steel nails or “subject product” covered by these investigations is certain steel nails having a shaft length not to exceed 12 inches. Certain steel nails include, but are not limited to, nails made from round wire and nails that are cut from plate. Certain steel nails may be made of one piece construction or constructed of two or more pieces. Certain steel nails may be produced from any type of steel, and may have any type of surface finish, head type, shank, point type, shaft length and shaft diameter. Finishes include, but are not limited to, coating in vinyl, zinc (galvanized, including but not limited to electroplating or hot dipping one or more times), phosphate cement, and paint. Certain steel nails may have one or more surface finishes. Head styles include, but are not limited to, flat, projection, cupped, oval, brad, headless, double, countersunk, and sinker. Shank styles include, but are not limited to, smooth, barbed, screw threaded, ring shank and fluted. Screw-threaded nails subjected to this proceeding are driven using direct force and not by turning the fastener using a tool that engages with the head. Point styles include, but are not limited to, diamond, blunt, needle, chisel and no point. Certain steel nails remain subject to the order whether imported alone or in combination with other articles.

Excluded from the scope of the order are steel roofing nails specifically certified at the time of entry to satisfy the specifications of certain Type I, Style 20 nails as identified in Tables 29 through 33 of ASTM Standard F 1667 (2013 revision). Also excluded from the scope of the order are fasteners suitable for use in powder-actuated hand tools, not threaded and threaded, which are currently classified under HTSUS 7317.00.20. and 7317.00.30. Also excluded from the scope of the order are fasteners having a case hardness greater than or equal to 50 HRC, a carbon content greater than or equal to 0.5 percent, a round head, a secondary reduced-diameter raised head section, a centered shank, and a smooth symmetrical point, suitable for use in gas-actuated hand tools. Also excluded from the scope of the order are corrugated nails. A corrugated nail is made of a small strip of corrugated steel with sharp points on the side. Also excluded from the scope of the order are thumb tacks, which are currently classified under HTSUS 7317.00.10.00.

Certain steel nails subject to this proceeding are currently classified under the Harmonized Tariff Schedule of the United States (“HTSUS”) subheadings 7317.00.55, 7317.00.65 and 7317.00.75. While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this order is dispositive.
