

EMERGENCY JUSTIFICATION

The Military Compensation and Retirement Modernization Commission (MCRMC) respectfully requests emergency processing and approval of the collection of information discussed herein. The proposed information collection is essential to the Congressionally-mandated mission of this temporary agency and the use of normal clearance procedures will prevent timely collection of information from military retirees, a specific class of individuals who the Commission's deliberations will affect. Given the Commission's extensive work, Congress approved an extension of the Commission with a reporting deadline of February 1, 2015. To be able to provide to the President and Congress with the information required and necessary for legislation to be proposed, the Commission must begin the survey process immediately.
