

**Burden Statement**

*According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0596-0226. The time required to complete this information collection is estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.*

*The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).*

*To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, 1400 Independence Avenue, SW, Washington, DC 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.*

**Type 2 IA -Type 2 Fire Crew Utilization**

NWCG has tasked the Operations and Workforce Development Committee with evaluating the standards, use, and effectiveness of Type 2 IA and Type 2 crews.

**Issue:**

During low to moderate fire activity, Type 1 crews are fully committed and typically remain in that status for the duration of the fire season. Tactically, Type 2IA and Type 2 crews are established to compliment Type 1 crews. However, Type 2IA crews are underutilized and the use of Type 2 crews is even more limited. The result is an overwhelming imbalance of crew deployments, which in the long term affects response capability and local ability to support the staffing of Type 2 and Type 2IA crews. Additionally, over the course of a long fire season, this imbalance exacerbates fatigue management issues with Type 1 crews.

In order to complete this evaluation and provide meaningful recommendations to NWCG, we are asking for your responses to the following questions.

---

When placing an order for a handcrew, what is your most important consideration in order of priority? Please prioritize each item.

- Availability
- Capability
- Cost
- Efficiency
- Logistics

**Type 2 IA**

Why do you typically order Type 2 IA Crews? (Choose one)

- A. These were the crews needed to implement preferred strategy
- B. Type 1 crews were not available

What are the major advantages of using Type 2 IA crews?

What if any are the major disadvantages with using Type 2 IA crews?

What percentage of the time do you use Type 2 IA crews for initial attack?

What percentage of the time do you split Type 2 IA crews into modules for tactical missions?

What percentage of the time do Type 2 IA crews meet your needs and expectations?

Do Type 2 IA crews perform to the current standards?

Are the current standards for Type 2 IA crews useful?

If you think the standards should be changed, how should they be changed?

Do Type 2 IA crews limit suppression effectiveness/efficiency or implementation of selected strategy?

Comments?

---

## **Type 2**

Why do you typically order Type 2 Crews? (Choose one)

- A. These were the crews needed to implement preferred strategy
- B. Type 1 or Type 2 IA crews were not available

What are the major advantages of using Type 2 crews?

What if any are the major disadvantages with using Type 2 crews?

What percentage of the time do you use Type 2 crews for initial attack?

What percentage of the time do Type 2 crews meet your needs and expectations?

What percentage of the time do Type 2 crews perform to the current standards?

Are the current standards for Type 2 crews useful?

If you think the standards should be changed, how should they be changed?

Do Type 2 crews limit suppression effectiveness/efficiency or implementation of selected strategy?

Comments?

---

Are there significant performance differences between Type 2 IA and Type 2 crews?

Do you refrain from using these crews due to concern for their safety?

If you do please explain.

If the crews sent to your fire were not what you ordered, did you have to adjust strategies and tactics?

Additional Comments

Please check the appropriate position below. (**Check the Primary box for your primary role related to this survey**):

Home Unit Position

- Duty Officer
- Fire Staff Officer
- Fire Management Officer
- Assistant Fire Management Officer
- DIVS
- Module Leader
  - Engine
  - Crew
    - Type 1
    - Type 2 IA
    - Type 2
- Other

Primary ICS position

- IC
  - Type 1
  - Type 2
  - Type 3
- OPSC
  - Type 1
  - Type 2
  - Type 3
- SOF
  - Type 1
  - Type 2

- o Type 3
- PSC
  - o Type 1
  - o Type 2
  - o Type 3
- Branch Chief
- DIVS
- Other

Geographic Area

- Eastern
- Southern
- Southwest
- Northwest
- Northern Rockies
- Rocky Mountain
- East Basin
- West Basin
- North Ops
- South Ops

Agency:

- USFS
