Pipes come in many shapes and sizes. They all have a bowl that holds the tobacco and a stem. Pipe tobacco is often sold loose in packages or tins. In the following section, we are only asking about smoking pipes filled with tobacco. The picture below shows a typical pipe and some pipe tobacco.

DISSOLVABLE TOBACCO SECTION

The next questions ask about another type of tobacco called **dissolvable tobacco**. You don't smoke dissolvable tobacco products – they are made of finely ground flavored tobacco that dissolves in your mouth.

Dissolvable tobacco products come in a variety of shapes, including small round pellets, thin sticks and flat strips. Some common brands are Ariva, Stonewall, or Camel Orbs, Sticks or Strips.

For current users and former users that have quit using tobacco in the past 12 months (note these are established tobacco users, determined by the variable CURRENT_USER_TOB = 1 and FORMER_USER_12_MONTH_TOB = 1 in Appendix B). Respondents will be asked the questions in the NDSKIP LOOP #1, NDSKIP LOOP #2, NDSKIP LOOP #3 and NDSKIP LOOP #4 sections up to two times, according to the following conditions:

Condition a) Respondents who currently use or formerly used in the past 12 months only one product. Condition a will be asked the questions in the loop one time, with fills tailored to their specific product.

Condition b) Respondents who currently use or formerly used in the past 12 months more than one product, where one of those products is/was an e-cigarette. Condition b will respond to the questions in the loop twice. The first time they will respond to questions with fills tailored to their e-cigarettes. The second time they will respond to questions with fills tailored to either:

- (b1) their other specific product, if they use two products total (e-cigarettes + one other product),
- or
- (b2) their tobacco use overall, if they use more than two products total (e-cigarettes + tobacco).

There are a few questions for Condition b that are asked only 1 time, and not repeated in each loop.

Condition c) Respondents who currently use or formerly used in the past 12 months more than one product, where none of those products is an e-cigarette. Condition c will respond to the questions in the loop one time, with fills tailored to their tobacco use overall.

For experimental users who are experimenting with more than 1 product (note these are not established tobacco users, determined by the variable CURRENT_USER_TOB = 0 in Appendix B). Experimental tobacco users who are not current tobacco users and who are experimenting with just one product will be asked the NRT/Rx NEQ questions but will skip the withdrawal/dependence and quitting questions. Experimental tobacco users who are not current tobacco users and who are experimenting with more than one product will be asked the NRT/Rx NEQ questions and the withdrawal/dependence questions but will skip the quitting questions. Experimental users will furthermore be routed according to condition b, b1, b2 and c as described for current users.
