Family Cohesion

The following are statements about families. You are to decide which of these statements are true of your family and which are false. If you think the statement is True or mostly True of your family, please respond True. If you think the statement is False or mostly False of your family, please respond False. You may feel that some of the statements are true for some family members and false for others. Respond True if the statement is true for most members. Respond False if the statement is false for most members. If the members are evenly divided, decide what is the stronger overall impression and answer accordingly. Remember, we would like to know what your family seems like to you. So do not try to figure out how other members see your family, but do give us your general impression of your family for each statement.

Household Composition

(Note – from U.S. Census. A household includes all the persons who occupy a housing unit as their usual place of residence. A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied (or if vacant, is intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live and eat separately from any other persons in the building and which have direct access from outside the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements. *Modified definition will be included on form or in Q x Q).*
