G. FCR INPUT TRANSACTION LAYOUTS

This appendix includes the layouts for the records that are accepted by the FCR system. Each record layout in this section includes the following information:

1. **Field Name** – The name of the field as it appears on the input transaction layout.
2. **Location** – The position of the field on the record.
3. **Length** – The size of the field on the record layout.
4. **A/N** – The type of field: alphabetic (A), numeric (N), or alphanumeric (A/N).
5. **Comments** – Indicates if the field is required for the transaction, and provides an explanation of the field and the field’s relationship to other fields or records.

The Comments section of the record layouts indicates when the field is required for the transaction. Fields defined as “Conditionally Required” are required to be present on the input record, based on the conditions that are described in the Comments field. Comments also provide an explanation of the field and its relationship to other fields or records. Additional information regarding each field is in Appendix E, “Data Dictionary.”

Input transactions are transmitted to the FCR using SSA’s network and the CyberFusion Integration Suite (CFI) protocol. Additional information regarding CFI and the process for transmission of data to the FCR is in Section 3.1, “CyberFusion (CFI).” When transmitting input records, the FCR Transmission Header record must be the first record in the transmission. If the Header record is not the first record in the transmission, the system rejects all records until a Header record is located. The data transmitted to the FCR must comply with the following requirements:

1. All data must be in EBCDIC format.
2. All alphabetic data, except the User Field, must be in upper case.
3. All alphabetic and alphanumeric data must be left-justified.
4. All numeric data must be right-justified and zero-filled.
5. All dates must be in CCYYMMDD format.
6. All Filler fields must be filled with spaces, not low values.

Additional information regarding each field is in Appendix D, “Data Dictionary.”

Chart G-1 lists and describes the input record layouts that are accepted by the FCR system.

Figure G-1, “FCR Batch Input Record Relationships,” is a diagram that shows the relationship of the input records within a batch.

CHART G-: INPUT RECORD LAYOUTS ACCEPTED BY THE FCR

Input Record Name	Record Purpose
FCR Transmission Header Record	<p>This record contains a record identifier of 'FA'. This record must be the first record in a batch of transaction records that are sent to the FCR. It identifies the submitter of the batch of transactions. The batch number included in this record uniquely identifies the batch.</p>
FCR Input Case Record	<p>This record contains a record identifier of 'FC'. You can use this record to add cases to the FCR. You can also use this record to change case information or to delete a case that was added to the FCR. Whenever you close a case on your system, using valid case closure criteria under §45 CFR 303.11, you must send a Delete transaction to the FCR that indicates that the case has been closed. Upon receipt and acceptance of the Delete transaction, the case is deleted from the FCR. The case closure criteria are permissive rather than mandatory. If a case does not meet one of the closure criteria, it must remain open. However, you have the option of leaving a case open even if it does meet the case closure criteria. When deciding whether to close a case, which would delete it from the FCR as well, you should weigh the benefits of keeping the case on the FCR or deleting it. Three explanations of this record are provided in this appendix, based on the action being requested: add, change or delete a case. While a single record format is used, the separate explanations are intended to provide a clear definition of the required and optional fields, based on the record's action type code.</p>

CHART G-: INPUT RECORD LAYOUTS ACCEPTED BY THE FCR

Input Record Name	Record Purpose
FCR Input Person/Locate Request Record	<p>This record contains a record identifier of ‘FP’.</p> <p>You can use this record to add a person in a child support case to the FCR. You can also use this record to change information for, or to delete, a person from a case on the FCR. The submitted record can include an SSN/name combination that is validated using the SSA SSN verification routines. If the person’s SSN is not available to the submitter, additional information can be submitted on this record that allows the FCR to automatically utilize SSA and IRS SSN identification routines to obtain the SSN.</p> <p>You can also use this record to initiate or terminate a request for Locate processing for a person. The request for Locate processing can be initiated when the person information is being added or changed. A Locate can also be initiated using this record without adding or changing a person on the FCR. You must specify the desired Locate sources on the record.</p> <p>Note: Under certain conditions, the FCR automatically performs a Locate of the NDNH when a person is added to, or changed on, the FCR. Refer to Section 6.10, “Proactive Matching.”</p> <p>Five explanations of this record are provided in this appendix based on the action being requested:</p> <ol style="list-style-type: none"> 1. add a person 2. change a person 3. delete a person from a case 4. initiate a request for Locate, or 5. terminate a Locate Request <p>While a single record format is used for each of these actions, the separate explanations are intended to provide a clear definition of the required and optional fields, based on the record’s action type code.</p>
FCR Input Query Record	<p>This record contains a record identifier of ‘FR’.</p> <p>You can use this record to obtain, when authorized, case and associated person(s) information from the FCR for a specific person. You are authorized to submit and receive FCR information for a person whom you have registered on the FCR.</p>

CHART G-: INPUT RECORD LAYOUTS ACCEPTED BY THE FCR	
Input Record Name	Record Purpose
FCR Change of Address Verification Request Record	This record contains a record identifier of 'NC'. You can use this record to request verification of an address for a IV-D participant, using the NCOA ^{Link®} database.
FCR Input Trailer Record	This record contains a record identifier of 'FZ'. This record must be the last record in a batch of transactions sent to the FCR. This record indicates the total number of transactions included in the transmission. It is used to determine if the transmission was successfully completed.

OMB Control Number: 0980-0271 Expiration date: 04/30/2011				
Field Name	Location	Length	A/N	Comments
Record Identifier	1-2	2	A/N	Required This field must contain the characters 'FA'.
Transmitter State/Territory Code	3-4	2	A/N	Required This field must contain the two-digit numeric FIPS code of the state or territory that is transmitting data to the FCR. Refer to Appendix F, "State and Territory Abbreviations and FIPS Codes," or the Department of Commerce <i>FIPS Code Manual, National Institute of Standards and Technology</i> , FIPS PUB 6-4 (April 1995) for a list of these codes. In addition, FIPS codes are on the Internet at http://www.itl.nist.gov
Version Control Number	5-9	5	A/N	Required This field must contain the numbers '01.00'. OCSE will notify you when this field changes.
Date Stamp	10-17	8	N	Required This field must contain the date of transmission to the FCR. This must be in CCYYMMDD format.
Batch Number	18-23	6	A/N	Required This field should be a sequential number generated by the transmitting state or territory. Do not repeat batch numbers.
Filler	24-640	617	A/N	This field is for future versions. For the current version, fill with spaces.

THE PAPERWORK REDUCTION ACT OF 1995

Public reporting burden for this collection of information is estimated to average 660 hours per month for processing input and output files, including the time

for reviewing instructions, gathering and maintaining the data needed, and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.
