SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, Section 101(a) of the Mine Act, 30 U.S.C. 811 authorizes the Secretary to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines.

The Mine Act authorizes the National Institute for Occupational Safety and Health (NIOSH) to study the causes and consequences of coal-related respiratory disease, and in cooperation with MSHA, to carry out a program for early detection and prevention of pneumoconiosis. NIOSH administers the National Coal Workers' Health Surveillance Program, "Specifications for Medical Examinations of Underground Coal Miners," as specified in 42 CFR part 37. 30 CFR 72.100 contains collection requirements for these activities in paragraphs (d) and (e).

Section 72.100(d) requires that each mine operator must develop and submit for approval to NIOSH a plan in accordance with 42 CFR part 37 for providing miners with the required periodic examinations specified in 72.100(a) and a roster specifying the name and current address of each miner covered by the plan.

Section 72.100(e) requires that each mine operator must post on the mine bulletin board at all times the approved plan for providing the examinations specified in 72.100(a).

Section 72.100(d) and (e) are requirements that mirror NIOSH information collection requirements under 42 CFR 37.4 (existing OMB No. 0920-0020). Including these requirements allows MSHA to use its inspection and enforcement authority to ensure that operators comply with these provisions.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Periodic Medical Surveillance Examinations For Coal Miners. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The information collection request will be available on <http://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on www.regulations.gov and www.reginfo.gov.
