

QCEW Final Instrument

Introduction

We would like to hear your opinions about statistical products provided by the Quarterly Census of Employment and Wages (QCEW) program, also known as the ES-202 program.

Your participation in this survey will help us improve the statistics we provide.

For ease of responding, most of the survey questions have been designed to allow you to simply check a box, but you are free to skip any question you don't want to answer, and you will have the opportunity to give us more detailed, written comments about any subject.

Your participation in this survey is voluntary. We estimate that it will take you 15 minutes to complete this survey. We are collecting this information under OMB Number 1225-0088. Without this currently approved number, we could not conduct this survey. (Expiration: April 30, 2018).

We appreciate your time and help. Thank you!

Introduction to Revised Data Section

To reflect the receipt of additional data and other information, QCEW revises published data several times.

Initial statistics are published reflecting reports sent in by almost all covered establishments and provide a preliminary picture of employment. Data for missing establishments are imputed to yield a representative total.

As more reports are received, a revised or updated set of statistics is published as the calendar year progresses. Most of the additional data is incorporated with the first revision. QCEW data for the past year are finalized with the release of data for the first quarter of the new year.
