PART 1 LEA FORM: Fall Snapshot Data

GENERAL INSTRUCTIONS

- Counts by race/ethnicity by sex are unduplicated counts (i.e., a student is counted only once in the race/ethnicity columns).
- Students counted in the race/ethnicity category may also be counted in the Students with Disabilities (IDEA), Students with Disabilities (Section 504 only), and Students who are limited English proficient (LEP) categories. For example, the following may occur:
 - A Hispanic/Latino student with a disability served under IDEA and who is LEP will be counted three times in some tables, once under race/ethnicity, once under Students with Disabilities (IDEA), and once under Students who are LEP.
 - A student with a disability served under section 504 and who is LEP will be counted in both the Students with Disabilities (Section 504 only) category and the Students who are LEP category.
- For tables that include data by race/ethnicity by sex, the Web-based survey tool will keep a running total of the values you enter in the race/ethnicity columns for each row. As you enter a number in any race/ethnicity category, that number will automatically be added to the Total column. Therefore, the sum of the counts that you enter for race/ethnicity by sex will be the total count of students for the particular row. Because it is not possible for your LEA to modify the total, you must ensure that every student is included in one and only one race/ethnicity category.
