Almost all reports will be "Approved for public release; federal purpose rights". Here are some general rules of thumb:

- Almost all reports for grants should be public release.
 - Proprietary information is RARE!
- Just because it is DoD (Army) does not mean it is proprietary. (Unless explicitly stated in the contract)
- Proprietary information is just that, copyrighted or patent information and in general should be marked in the report as proprietary.
 - Whether or not it is a final report has no bearing on proprietary information.
 - SBIR and STTR contracts have a higher incidence of proprietary information.

Approved for Public Release; Distribution Unlimited

Distribution

NOTE: Limited distribution is RARE. Most University research is 'unlimited distribution.' However, this capability is provided for cases when your report contains proprietary information (typically only for businesses), or if your report contains sensitive data such as personally identifiable information (SSN, account numbers, addresses, etc. - RARE), or data that could be damaging to the U.S. Army (information related to troop movement, military capabilities, new technologies in the field, etc. - VERY RARE).

Limit my report distribution.

Approved for public release; distribution is unlimited.
