Title of Project Post-Launch Usability Testing for the Division of HIV/AIDS Prevention Website Redesign

Attachment 2

Survey Instrument for Post-Launch Usability Testing for the Division of HIV/AIDS Prevention Website Redesign

Public reporting burden of this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer; 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; Attn: OMB-PRA (0920-1027)

DHAP Post-Launch HIV/AIDS Website UX Testing Instrument

A facilitator will present the tasks to the **in-person** participants who will navigate the website to locate answers. The respondent is to use the HIV/AIDS website to locate the answers to the questions that are displayed on the screen.

These tasks will be presented to **online** participants via UserZoom survey. The UserZoom screenshots follow the narrative tasks.

The grouping of the tasks below indicates the type of participant being queried.

Consumer

Task #	Task Scenarios
1	Which body fluids have been shown to transmit HIV?
2	What is the most common screening test in the U.S. that looks for antibodies to HIV?
3	In 2009, blacks comprised 12% of the U.S. population but accounted for what percentage of all new HIV infections?
