

Are you doing it?

Testing all your patients for HIV

CDC now recommends HIV screening for all patients ages 13 to 64

HIV has crossed the boundaries of sexual orientation, gender, age, and ethnicity. CDC estimates...

- More than 1.2 million people in the United States now have HIV
- Approximately 1 in 8 of those infected are unaware of their HIV status

For free materials to incorporate HIV screening into your practice, visit: <http://hivscreening.amjmed.com> or call 800-232-4636.

Test all your patients for HIV

It's the standard of care
