OMB No. 0920-0607

Exp. Date: 12/31/2015

Public Reporting burden of this collection of information is estimated at 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer, 1600 Clifton Road NW, MS D-74, Atlanta, GA 30333; Attn: PRA (0920-0607).

3.0 Circumstances

3.1 Mental, Health, Substance Abuse, and Other Addiction & Relationship and Life Stressors

CIRCUMSTANCE VARIABLE NAMES BY DATA SOURCE (CME AND LE)

Variables abstracted from both the CME and the LE reports are exported into two variables. If the CME report is the source, the variable name is preceded by “CME_” (e.g., “CME_VariableName”). If the LE report is the source, the variable name is preceded by “LE_” (e.g., “LE_VariableName”). For instance, information on the “Argument” variable will be stored in “CME_Argument” and “LE_Argument”

CRISIS VARIABLE NAMES

Whether a circumstance was a crisis (i.e., checking the “LE Crisis” or “CME Crisis” checkbox) is stored in a separate variable from the circumstance in the export file. Specifically, crisis variables will have the word “crisis” inserted between the data source (i.e., LE and CME) and the circumstance name in the variable label variable (e.g., CME_CrisisVariableName, LE_CrisisVariableName). For example, the crisis variables for “Stalking” will be CME_CrisisStalking and LE_CrisisStalking.
