OTHER:			

*Occupied Territory* - a territory where either a pair of Peregrines is present (two adults or an adult/subadult mixed pair), or there is evidence of reproduction [e.g., one adult is observed sitting low in the nest, eggs or young are seen, or food is delivered into eyrie (nest site)]. Occupancy for a territory must be established for at least one of two, and possibly more, 4-hour site visits. Occupancy within a region is the number of occupied territories divided by the number of territories that were checked for occupancy.

*Nest Success* - the proportion of occupied territories in a monitoring region in which one or more young  $\ge 28$  days old is observed, with age determined following guidelines in Cade et al. (1996).

*Productivity* - the number of young observed at  $\ge$  28 days old per occupied territory, averaged across a monitoring region.

**Paperwork Reduction Act**: The total annual paperwork burden per respondent is estimated to be 2 1/2 hours. This includes time for reviewing instructions, gathering and maintaining data, and preparing and transmitting reports. Send comments regarding the burden estimate or any other aspect of the reporting requirement(s) to the Service Information Collection Clearance Officer, Fish and Wildlife Service, 4401 N. Fairfax Drive, MS 2042-PDM, Arlington, VA 22203.

An agency may not conduct and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

OMB has approved this collection of information and assigned OMB Control No. 1018-0101.
