The summaries below describe the nature of the information collection requests (ICRs) and their expected burdens. The revised requests are being submitted for clearance by OMB as required by the PRA.

Title: Railroad Operating Rules.

OMB Control Number: 2130–0035.

Abstract: The collection of information is due to the railroad operating rules set forth in 49 CFR part 217 which require Class I and Class II railroads to file with FRA copies of their operating rules, timetables, and timetable special instructions, and subsequent amendments thereto. Class III railroads are required to retain copies of these documents at their systems headquarters. Also, 49 CFR 220.21(b) prescribes the collection of information which requires railroads to retain one copy of their current operating rules with respect to radio communications and one copy of each subsequent amendment thereto. These documents must be made available to FRA upon request. Through these rules, FRA learns the condition of operating rules and practices with respect to trains and instructions provided by the railroad to their employees in operating practices.

Type of Request: Extension with change of a currently approved information collection.

Affected Public: Businesses (Railroads).

Form Number(s): N/A.

Annual Estimated Burden: 4,835,299 hours.

Title: Reflectorization of Freight Stock.

OMB Control Number: 2130–0566.

Abstract: The Federal Railroad Administration (FRA) issued this regulation to mandate the reflectorization of freight rolling stock (freight cars and locomotives) to enhance the visibility of trains in order to reduce the number and severity of accidents at highway-rail grade

crossings in which train visibility acted as a contributing factor. The information collected is used by FRA to ensure that railroads/car owners follow the schedule established by the regulation for placing retro-reflective material on the sides of freight rolling stock (freight cars and locomotives) in order to improve the visibility of trains. The information is also used by FRA to confirm that railroads/car owners meet the prescribed standards for the application, inspection, and maintenance of the required retro-reflective material.

Type of Request: Extension with change of a currently approved information collection.

Affected Public: Businesses (Railroads).

Form Number(s): FRA F 6180.113.

Annual Estimated Burden: 8,769 hours.

Title: Track Safety Standards: Concrete Crossties.

OMB Control Number: 2130–0592.

Abstract: On April 1, 2011, FRA amended the Federal Track Safety Standards to promote the safety of railroad operations over track constructed with concrete crossties. In particular, FRA mandated specific requirements for effective concrete crossties, for rail fastening systems connected to concrete crossties, and for automated inspections of track constructed with concrete crossties. The information collected under § 213.234 is used by FRA to ensure that automated track inspections of track constructed with concrete crossties are carried out as specified in this section to supplement visual inspections by Class I and Class II railroads, intercity passenger railroads, and commuter railroads or small government jurisdictions that serve populations greater than 50,000.

Type of Request: Extension with change of a currently approved information collection.

Affected Public: Businesses (Railroads).

Form Number(s): N/A.

Annual Estimated Burden: 5,677 hours.

Addressee: Send comments regarding these information collections to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 Seventeenth Street NW., Washington, DC, 20503, Attention: FRA Desk Officer. Comments may also be sent via email to OMB at the following address: oir_submissions@omb.eop.gov.

Comments are invited on the following: Whether the proposed collections of information are necessary

for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimates of the burden of the proposed information collections; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collections of information on respondents, including the use of automated collection techniques or other forms of information technology.

A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this notice in the **Federal Register**.

Authority: 44 U.S.C. 3501–3520.

Issued in Washington, DC on July 7, 2014.
