HUD Master Models Combined Lead

<u>Lead-Based Paint Hazard Control, Lead Hazard Reduction Demonstration, and Operation Lead Elimination Action Program (LEAP)</u>

The goal of these programs is to develop and deliver comprehensive programs to identify and control lead-based paint hazards in eligible privately owned housing.

Need Statement

There is a need to mitigate residential lead-based paint hazards that threaten the long-term health of children less than six years of age in single-and multifamily housing by 2010.

<u>Evaluation Process – These are standard requirements that HUD will expect every program manager receiving a grant to do as part of their project management.</u>

- An evaluation process will be part of the on-going management of the program.
- Comparisons will be made between projected and actual numbers for both outputs and outcomes.
- Deviations from projected outputs and outcomes will be documented and explained.
- Analysis of data to determine the relationship of outputs to outcomes; what outputs produce which outcomes.

<u>HUD Will Use The Following Management Questions To Evaluate Your Program</u>

- 1. How many children were screened?
- 2. How many children were identified with unsafe blood lead levels?
- 3. How many children with unsafe blood lead levels were referred for medical follow-up?
- 4. How many children experienced a decrease in their blood lead levels?
- 5. How many housing units were assessed?
- 6. How many housing units were identified with lead-based paint hazards?
- 7. How many housing units were cleared/remediated free of lead-based paint hazards?
- 8. How many homes were in historic preservation districts?
- 9. How many additional dollars from other sources were leveraged to support your lead program?
- 10. What percentage of leveraged funds to all funds was used for your lead program?

- 11. What in-kind or donated labor or materials were contributed to support your community lead control program(s)? If yes, please assign a dollar value to the in-kind or donated labor or materials.
- 12. Did the leveraging of funds and contribution of in-kind and donated materials and services yield a sustainable community lead control program(s)? If not, why?
- 13. How many persons were trained to perform lead hazard control, reduction and elimination work?
- 14. How many persons are certified to perform lead hazard control, reduction and elimination work?
- 15. How many Section 3 persons are certified to perform lead hazard control, reduction and elimination work?
- 16. How many certified persons are employed to perform lead hazard control, reduction and elimination work?
- 17. How many Section 3 certified persons are employed to perform lead hazard control, reduction and elimination work?
- 18. Was there an increase in the number of certified persons employed to perform lead hazard control, reduction and elimination work?
- 19. Was there an increase in the number of Section 3 certified persons employed to perform lead hazard control, reduction and elimination work?

Carter-Richmond Methodology

The above Management Questions developed for your program are based on the Carter-Richmond Methodology1. A description of the Carter-Richmond Methodology appears in the General Section of the NOFA.
