Introduction

This Compendium includes a set of survey questions compiled in support of the “Interagency Programmatic Clearance for Federal Land Management Agencies (FLMAs) Collaborative Visitor Feedback Surveys on Recreation and Transportation Related Programs and Systems.” The purpose of this project is to collect information that will help the FLMAs, including the Bureau of Land Management (BLM), U.S. Fish and Wildlife Service (USFWS), National Park Service (NPS), U.S. Forest Service (USFS) and U.S. Army Corps of Engineers (USACE) improve transportation conditions and recreation and resource management on the respective FLMAs and jointly at area, state, regional, and/or national scales.

The Compendium is divided into 5 key topic areas:

1. Respondent characteristics
2. Traveler Information
3. Trip Behaviors
4. Assessment of Visitor Experiences and Transportation-Related Facilities, Conditions and Services
5. Economic Impact and Visitor Spending/Costs

Each topic area is further subdivided into subsections, so that users can more easily locate questions (see Table of Contents). Each question has its own unique identifier. Most of the questions included in this Compendium were pulled from surveys that were previously approved by the Office of Management and Budget (OMB) (see the complete list of surveys on the next page). In addition, some questions were taken from surveys that have not received OMB approval; for the purpose of this OMB submission, these questions are highlighted in red in the Compendium. Finally, the Compendium also includes some new questions; these are highlighted in yellow to make them easier to identify.¹

Please note that in some cases changes were made to OMB-approved questions included in this compendium. For the purposes of this submission to OMB, any changes are highlighted in red font, and in most cases a comment is included to explain the reason for making the change.² References to specific sites (e.g., “Colonial National Historical Park” or “Tongass National Forest”) or to types of sites (e.g., “park,” “lake” or “forest”) have been removed and replaced with either an “[X]” or “[site].” For a number of questions (generally those pulled from the *NPS Pool of Known Questions*), specific response categories are not provided; instead, “area specific list” or “site specific list” is used to designate the response categories. In this way, FLMAs can customize the survey according to their needs.

¹ Once the final set of questions has been approved by OMB, the red and yellow highlights will be removed.

² Once the final set of questions has been approved by OMB, all comments will be removed.

Topic Area 1: Respondent Characteristics

The questions in this section ask visitors their personal and/or group socio-demographic information in order to better understand the populations visiting the site(s) and using the transportation system. In addition to relevant demographic information, questions regarding user group characteristics, visitation history and knowledge are also included. In addition, these questions will be used for analysis purposes to help us assess transportation performance among different sub-groups of users.

Topic Area 5: Economic Impact and Visitor Spending/Costs (ECON)

The questions in this section ask how much visitors spent on a visit to a site (in particular transportation costs) as well as questions about transportation-related fees, such as parking fees or shuttle fares. Federal Land Management Agencies will be able to measure their contributions to the economic development at the local, regional, and national levels through the responses collected. Additionally, some questions address the affordability of traveling to and through Federal public lands.
