## 2900. GENERAL

These forms must be used by all independent rural health clinics (RHCs) and freestanding Federally qualified health centers (FQHCs). These forms are required for determining Medicare payment for RHC and FQHC services under 42 CFR 405, Subpart X.

An RHC/FQHC must complete all applicable items on the worksheets. For its initial reporting period, the facility completes these worksheets with estimates of costs and visits and other information required by the reports. The contractor uses the estimates to determine an interim rate of payment for the facility. Following the end of the facility's reporting period, the facility is required to submit its worksheets using data based on its actual experience for the reporting period. This information is used by the contractor for determining the total Medicare payment due the RHC/FQHC for services furnished Medicare beneficiaries.

2900.1 Rounding Standards for Fractional Computations.--Throughout the Medicare cost report, required computations result in the use of fractions. Use the following rounding standards for such computations:

1. Round to 2 decimal places:
  - a. Rates
  - b. Cost per visit
  - c. Cost for pneumococcal vaccine
2. Round to 6 decimal places:
  - a. Ratios
  - b. Limit adjustments

## 2904. WORKSHEET A - RECLASSIFICATION AND ADJUSTMENT OF TRIAL BALANCE OF EXPENSES

Use Worksheet A to record the trial balance of expense accounts from your books and records. The worksheet also provides for the necessary reclassification and adjustments to certain accounts. All cost centers listed do not apply to all RHCs/FQHCs using this worksheet. For example, a facility might not employ laboratory technicians and does not, in that case, complete line 8. In addition to those lines listed, the worksheet also provides blank lines for other facility cost centers.

If the cost elements of a cost center are maintained separately on your books, a reconciliation of costs per the accounting books and records to those on this worksheet must be maintained by you and are subject to review by your contractor.

Under certain conditions, a provider may elect to use different cost centers for allocation purposes. These conditions are stated in CMS Pub. 15-1, §2313.

Standard (i.e., preprinted) CMS line numbers and cost center descriptions cannot be changed. If a provider needs to use additional or different cost center descriptions, it may do so by adding additional lines to the cost report. Added cost centers must be appropriately coded. Identify the added line as a numeric subscript of the immediately preceding line. That is, if two lines are added between lines 5 and 6, identify them as lines 5.01 and 5.02. If additional lines are added for general services cost centers.

Also, submit the working trial balance of the facility with the cost report. A working trial balance is a listing of the balances of the accounts in the general ledger to which adjustments are appended in supplementary columns and is used as a basic summary for financial statements.

Cost center coding is a methodology for standardizing the meaning of cost center labels as used by health care providers on the Medicare cost reports. The Form CMS 222-92 provides for *preprinted* cost center descriptions that may apply to RHC/FQHC services on Worksheet A. In addition, a space is provided for a cost center code. The preprinted cost center labels are automatically coded by CMS approved cost reporting software, hereafter referred to as the standard cost centers. One additional cost center description with general meaning has been identified. This additional description will hereafter be referred to as a nonstandard label with an "Other..." designation to provide for situations where no match in meaning to the standard cost centers can be found. Refer to Worksheet A, line 9.

The use of this coding methodology allows providers to continue to use labels for cost centers that have meaning within the individual institution. The four digit cost center codes that are associated with each provider label in their electronic file provide standardized meaning for data analysis. The preparer is required to compare any added or changed label to the descriptions offered on the standard or nonstandard cost center tables. A description of cost center coding and the table of cost center codes are in Table 5 of the electronic reporting specifications.

### Column Descriptions

Columns 1 through 3.--The expenses listed in these columns must be in accordance with your accounting books and records.

Enter on the appropriate lines in columns 1 through 3 the total expenses incurred during the reporting period. Detail the expenses as Compensation (column 1) and Other (column 2). The sum of columns 1 and 2 must equal column 3. Record any needed reclassification and adjustments in columns 4 and 6, as appropriate.

Column 4.--Enter any reclassification among cost center expenses which are needed to effect proper cost allocation.

Worksheet A-1 is provided to compute the reclassification affecting the expenses specified therein. This worksheet need not be completed by all facilities but must be completed only to the extent that the reclassification is needed and appropriate in the facility's circumstances.

## 2905. WORKSHEET A-1 - RECLASSIFICATION

This worksheet provides for the reclassification of certain amounts to effect the proper cost allocation. The cost centers affected must be specifically identifiable in your accounting records. Use reclassifications in instances in which the expenses applicable to more than one of the cost centers listed on Worksheet A are maintained in your accounting books and records in one cost center. For example, if a physician performs administrative duties, the appropriate portion of his/her compensation, payroll taxes and fringe benefits must be reclassified from "Facility Health Care Staff Cost" to "Facility Overhead", line 38 for the office salaries and line 45 for the benefits and taxes.

## 2906. WORKSHEET A-2 - ADJUSTMENTS TO EXPENSES

This worksheet provides for adjusting the expenses listed on Worksheet A, column 5. Make these adjustments, which are required under the Medicare principles of reimbursement, on the basis of cost, or amount received. Enter the total amount received (revenue) only if the cost (including the direct cost and all applicable overhead) cannot be determined. However, if total direct and indirect cost can be determined, enter the cost. Once an adjustment to an expense is made on the basis of cost, you may not, in future cost reporting periods determine the required adjustment to the expense on the basis of revenue. Enter the following symbols in column 1 to indicate the basis for adjustments: "A" for costs and "B" for amount received. Line descriptions indicate the more common activities which affect allowable costs or result in costs incurred for reasons other than patient care and, thus, require adjustments.

Types of items to be entered on this worksheet are (1) those needed to adjust expenses incurred, (2) those items which constitute recovery of expenses through sales, charges, fees, etc, and (3) those items needed to adjust expenses in accordance with the Medicare principles of reimbursement. (See CMS Pub. 15-1, §2328.)

If an adjustment to an expense affects more than one cost center, record the adjustment to each cost center on a separate line on this worksheet.

### Line Descriptions

Line 1.--Investment income on restricted and unrestricted funds which are commingled with other funds must be applied together against the total interest expense included in allowable costs. (See CMS Pub. 15-1, §202.2.)

Apply the investment income on restricted and unrestricted funds which are commingled with other funds against the Administrative, Depreciation - Buildings and Fixtures, Depreciation - Equipment, and any other appropriate cost centers on the basis of the ratio that interest expense charged to each cost center bears to the total interest expense charges to all of your cost centers.

Line 5.--Enter the allowable home office costs which have been allocated to the facility. Use additional lines to the extent that various facility cost centers are affected. (See CMS Pub. 15-1, chapter 21.)

Line 6.--Obtain the amount to be entered on this line from Supplemental Worksheet A-2-1, Part II, column 6, line 5. Note that Worksheet A-2-1, Part II, lines 1 through 4, represent the detail of the various cost centers to be adjusted on Worksheet A.

Line 8.--Enter the amount which represents the allowable cost of the services furnished by National Health Service Corp (NHSC) personnel. Obtain this amount from your contractor.

Lines 9 and 10.--If depreciation expense computed in accordance with Medicare principles of reimbursement differs from depreciation expenses per your books, enter the difference on lines 9 and/or 10.

## 2907. WORKSHEET B - VISITS AND OVERHEAD COST FOR RHCs/FQHCs

Worksheet B is used by the RHC/FQHC to summarize (1) the visits furnished by your health care staff and by physicians under agreements with you, and (2) the overhead costs incurred by you which apply to RHC/FQHC services.

2907.1 Part I - Visits and Productivity.--Use Part I to summarize the number of facility visits furnished by the health care staff and to calculate the number of visits to be used in the rate determination. Productivity standards established by CMS are applied as a guideline that reflects the total combined services of the staff. Apply a level of 4200 visits for each physician and a level of 2100 visits for each nonphysician practitioner.

Lines 1 through 9 (and applicable subscripts) of Part I list the types of practitioners (positions) for whom facility visits must be counted and reported.

Line 1--Enter the number of FTEs and total visits furnished to facility patients by staff physicians working at the facility on a regular ongoing basis. Also include on this line, physician data (FTEs and visits) for services furnished to facility patients by staff physicians working under contractual agreement with you on a regular ongoing basis in the RHC/FQHC facility. These physicians are subject to productivity standards. See 42 CFR 405.2468(d)(2)(v).

Column 1.--Record the number of all full time equivalent (FTE) personnel in each of the applicable staff positions in the facility practice. (See *IOM 100-04, chapter 9, section 40.3* for a definition of FTEs.)

Column 2.--Record the total visits actually furnished to all patients by all personnel in each of the applicable staff positions in the reporting period. Count visits in accordance with instructions in 42 CFR 405.2401(b) defining a visit.

Column 3.--*Productivity standards established by CMS are guidelines that reflect the total combined services of the staff. Apply a level of 4200 visits for each physician and 2100 visits for each nonphysician practitioner. However, if you were granted an exception to the productivity standards (answered yes to question 8.51 of Worksheet S, Part I), enter on lines 1-3 the number of productivity visits approved by the contractor.*

*Contractors have the authority to waive productivity guidelines in cases where you have demonstrated reasonable justification for not meeting the standard. In such cases, the contractor may set any number of visits as reasonable (not just actual visits) if an exception is granted. For example, if the guideline is 4200 visits and you furnished only 1000 visits, the contractor may permit 2500 visits to be used in the calculation.*

Column 4.--This is the minimum number of facility visits the personnel in each staff position are expected to furnish. Enter the product of column 1 and column 3.

Column 5.--Enter the greater of the visits from column 2 or column 4. *Contractors* have the authority to waive the productivity guideline in cases where you have demonstrated reasonable justification for not meeting the standard. In such cases, the contractor could set any number of visits as reasonable (not just your actual visits) if an exception is granted. For example, if the guideline number is 4200 visits and you have only furnished 1000 visits, the contractor need not accept the 1000 visits but could permit 2500 visits to be used in the calculation.

Line 4.--Enter the total of lines 1 through 3.

Line 8.--Enter the total of lines 4 through 7.

Line 9.--Enter the number of visits furnished to facility patients by physicians under agreement with you who do not furnish services to patients on a regular ongoing basis in the RHC/FQHC facility. Physicians services under agreements with you are (1) all medical services performed at your site by a nonstaff physician who is not the owner or an employee of the facility, and (2) medical services performed at a location other than your site by such a physician for which the physician is compensated by you. While all physician services at your site are included in RHC/FQHC services, physician services furnished in other locations by physicians who are not on your full time staff are paid to you only if your agreement with the physician provides for compensation for such services.

2907.2 Part II - Determination of Total Allowable Cost Applicable To RHC/FQHC Services.--Use Part II to determine the amount of overhead cost applicable to RHC/FQHC services.

Line 10.--Enter the cost of RHC/FQHC services (excluding overhead) from Worksheet A, column 7, line 25 less the amount on Worksheet A, column 7, line 20.5

Line 11.--Enter the cost of services (other than RHC/FQHC services) excluding overhead from Worksheet A, column 7, sum of lines 57 and 61.

Line 12.--Enter the cost of all services (excluding overhead). It is the sum of lines 10 and 11.

Line 13.--Enter the percentage of RHC/FQHC services. This percentage is determined by dividing the amount on line 10 (the cost of RHC/FQHC services) by the amount on line 12 (the cost of all services, excluding overhead).

Line 14.--Enter the total overhead costs incurred from Worksheet A, column 7, line 50. It is the sum of facility costs and administrative overhead costs.

*Line 14.01.--Enter the amount of GME overhead costs. To determine the amount of GME overhead multiply the amount of facility overhead (from line 14) by the ratio of intern and resident visits (from Worksheet S, Part I, column 3, line 8.50) to total visits (from Worksheet C, Part I, line 6).*

*Line 14.02.--Enter the net facility overhead costs by subtracting line 14.01 from line 14.*

Line 15.--Enter the overhead amount applicable to RHC/FQHC services. Multiply the amount on line 13 (the percentage of RHC/FQHC services) by the amount on line 14 (total overhead). *When an amount is entered on line 14.01, enter the result of multiplying the amount on line 13 (the percentage of RHC/FQHC services) by the amount on line 14.02 (net facility overhead).*

Line 16.--Enter the total allowable cost of RHC/FQHC services. It is the sum of line 10 (cost of RHC/FQHC services other than overhead services) and line 15 (overhead services applicable to RHC/FQHC services).

**2908. WORKSHEET C - DETERMINATION OF MEDICARE PAYMENT**

Use this worksheet to determine the interim all inclusive rate of payment and the total Medicare payment due you for the reporting period.

**2908.1 Part I - Determination of Rate For RHC/FQHC Services.**--Use Part I to calculate the cost per visit for RHC/FQHC services and to apply the screening guideline established by CMS on your health care staff productivity.

Line 1.--Enter the total allowable cost from Worksheet B, Part II, line 16.

Line 2.--Enter the total cost of pneumococcal and influenza vaccine from Supplemental Worksheet B-1, line 15.

Line 3.--Subtract the amount on line 2 from the amount on line 1 and enter the result.

Line 4.--Enter the greater of the minimum or actual visits by the health care staff from Worksheet B, Part I, column 5, line 8.

Line 5.--Enter the visits made by physicians under agreement from Worksheet B, Part I, column 5, line 9.

Line 6.--Enter the total adjusted visits (sum of lines 4 and 5).

Line 7.--Enter the adjusted cost per visit. This is determined by dividing the amount on line 3 by the visits on line 6.

Lines 8 through 18.--Complete columns 1 and 2 of lines 8 through 18 to identify costs and visits affected by different payment limits during a cost reporting period. For lines 11 through 18, enter in column 3 the sum of columns 1 and 2 (and 2.01, if applicable). Enter the rates and the corresponding data chronologically in the appropriate column as they occur during the cost reporting period. For example, if only one payment limit is applicable during the cost reporting period complete column 1 only. Column 2 can be subscribed to accommodate the possibility of three per visit limits during a cost reporting period.

For services rendered from January 1, 2010, through December 31, 2013, the maximum rate per visit entered on line 8 and the outpatient mental health treatment service limitation applied on line 15 both correspond to the same time period (partial calendar year). Consequently, both are entered in the same column and no further subscribing of the columns are necessary.

Line 8.--Enter the maximum rate per visit that can be received by you. Obtain this amount from PM A-03-21 or from your contractor.

Line 9.--Enter the lesser of the amount on line 7 or line 8.

**2908.2 Part II - Determination of Total Payment.**--Use Part II to determine the total Medicare payment due you for covered RHC/FQHC services furnished to Medicare beneficiaries during the reporting period.

Line 10.--Enter the rate for Medicare covered visits from line 9.

The cost and administration of pneumococcal and influenza vaccine to Medicare beneficiaries are 100 percent reimbursable by Medicare. This worksheet provides for the computation of the cost of the pneumococcal vaccine.

Effective for services rendered on or after September 1, 2009, the administration of influenza H1N1 vaccines furnished by RHCs and FQHCs are cost reimbursed. However, no cost will be incurred for the influenza H1N1 vaccine as this is provided free of charge to providers/suppliers.

To account for the cost of administering seasonal influenza vaccines, influenza H1N1 vaccines, and/or both vaccines administered during the same patient visit, column 2 is subscripted adding column 2.01 (administration of only H1N1 vaccines) and 2.02 (administration of both the seasonal influenza and H1N1 vaccines during the same patient visit). The data entered in all columns (1, 2, and applicable subscripts) for lines 4, 11, and 13 are mutually exclusive. That is, the vaccine costs, the total number of vaccines administered, and the total number of Medicare covered vaccines shall only be represented one time in the appropriate column. Columns 2.01 and 2.02 will not reflect the cost of H1N1 vaccines as it is furnished at no cost to the provider. Line 9.--Multiply the amount on line 7 by the amount on line 8 and enter the result.

Line 10.--Enter the sum of the amounts on lines 5 and 9. Transfer this amount to Worksheet C, Part I, line 2.

Line 11.--Enter the total number of pneumococcal and influenza vaccine injections from your records.

Line 12.--Enter the cost per pneumococcal and influenza vaccine injection by dividing the amount on line 10 by the number on line 11 and entering the result.

Line 13.--Enter the number of pneumococcal and influenza vaccine injections from your records.

Line 14.--Enter the cost per pneumococcal and influenza vaccine injection by multiplying the amount on line 12 by the amount on line 13.

Line 15.--Enter the total cost of pneumococcal and influenza vaccine and its (their) administration and the administration of H1N1 vaccines by entering the sum of the amount in column 1, line 10 and the amount in column 2 (and applicable subscripts), line 10. Transfer this amount to Worksheet C, Part I, line 2.

Line 16.--Enter the Medicare cost of pneumococcal and influenza vaccine and its (their) administration and the administration of H1N1 vaccines. ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-222-92  
TABLE 1 - RECORD SPECIFICATIONS

Table 1 specifies the standard record format to be used for electronic cost reporting. Each electronic cost report submission (file) has three types of records. The first group (type one records) contains information for identifying, processing, and resolving problems. The text used throughout the cost report for variable line labels (e.g., Worksheet A) is included in the type two records. Refer to Table 5 for cost center coding. The data detailed in Table 3 are identified as type three records. The encryption coding at the end of the file, records 1, 1.01, and 1.02, are type 4 records.

The medium for transferring cost reports submitted electronically to *contractors* is a 3½" *diskette, compact diskettes (CDs), or a flash drive*. These disks must be in IBM format. The character set must be ASCII. You must seek approval from your fiscal intermediary regarding alternate methods of submission to ensure that the method of transmission is acceptable.

The following are requirements for all records:

1. All alpha characters must be in upper case.
2. For micro systems, the end of record indicator must be a carriage return and line feed, in that sequence.
3. No record may exceed 60 characters.

Below is an example of a set of type 1 records with a narrative description of their meaning.

Record #1: This is a cost report file submitted by Provider 213975 for the period from April 1, 2009 (2009091) through March 31, 2010 (2010090). It is filed on FORM CMS-222-92. It is prepared with vendor number A99's PC based system, version number 1. Position 38 changes with each new test case and/or approval and is alpha. Positions 39 and 40 remain constant for approvals issued after the first test case. This file is prepared by the independent rural health clinic facility on April 30, 2010 (2010120). The electronic cost report specification dated October 1, 2009 (2009274) is used to prepare this file.

#### FILE NAMING CONVENTION

2. NNNNNN is the 6 digit Medicare independent rural health clinic or federally qualified health center provider number;
3. YY is the year in which the provider's cost reporting period ends; and
4. L is a character variable (A-Z) to enable separate identification of files from independent RHC/FQHC facility with two or more cost reporting periods ending in the same calendar year.

RECORD NAME: Type 4 Records - File Encryption

This type 4 record consists of 3 records: 1, 1.01, and 1.02. These records are created at the point in which the ECR file has been completed and saved to disk and insures the integrity of the file.

TABLE 2 - WORKSHEET INDICATORS

This table contains the worksheet indicators that are used for electronic cost reporting. A worksheet indicator is provided for only those worksheets for which data are to be provided.

The worksheet indicator consists of seven digits in positions 2-8 of the record identifier. The first two digits of the worksheet indicator (positions 2 and 3 of the record identifier) always show the worksheet. The third digit of the worksheet indicator (position 4 of the record identifier) is used to identify Supplemental worksheet A-2-1. For Worksheet A-1, if there is a need for extra lines on multiple worksheets, the fifth and sixth digits of the worksheet indicator (positions 6 and 7 of the record identifier) identify the page number. The seventh digit of the worksheet indicator (position 8 of the record identifier) represents the worksheet or worksheet part.

TABLE 2 - WORKSHEET INDICATORS

FOOTNOTES:

- (a) Multiple Worksheets for Reclassifications and Consolidated Cost Reports  
The fifth and sixth digits of the worksheet indicator (positions 6 and 7 of the record) are numeric from 01-99 to accommodate reports with more lines on Worksheets S, Part III and A-1. For reports that do not need additional worksheets, the default is 01. For reports that do need additional worksheets, the first page is numbered 01. The number for each additional page of the worksheet is incremented by 1.
- (b) Worksheets With Multiple Parts Using Identical Worksheet Indicator  
Although some worksheets have multiple parts, the lines are numbered sequentially. In these instances, the same worksheet identifier is used with all lines from this worksheet regardless of the worksheet part. This differs from the Table 3 presentation, which still identifies each worksheet and part as they appear on the printed cost report. This affects Worksheets B and C.

ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-222-92  
TABLE 3 - LIST OF DATA ELEMENTS WITH WORKSHEET, LINE, AND COLUMN  
DESIGNATIONS

This table identifies those data elements necessary to calculate a independent renal dialysis cost report. It also identifies some figures from a completed cost report. These calculated fields (e.g., Worksheet B, column 8) are needed to verify the mathematical accuracy of the raw data elements and to isolate differences between the file submitted by the independent renal dialysis facility and the report produced by the fiscal intermediary. Where an adjustment is made, that record must be present in the electronic data file. For explanations of the adjustments required, refer to the cost report instructions.

Table 3 "Usage" column is used to specify the format of each data item as follows:

9	Numeric, greater than or equal to zero.
-9	Numeric, may be either greater than, less than, or equal to zero.
9(x).9(y)	Numeric, greater than zero, with x or fewer significant digits to the left of the decimal point, a decimal point, and exactly y digits to the right of the decimal point.
X	Character.

Consistency in line numbering (and column numbering for general service cost centers) for each cost center is essential. The sequence of some cost centers does change among worksheets.

Table 3 refers to the data elements needed from a standard cost report. When a standard line is subscripted, the subscripted lines must be numbered sequentially with the first subline number displayed as "01" or "1" (with a space preceding the 1) in field locations 14-15. It is unacceptable to format in a series of 10, 20, or skip subline numbers (i.e., 01, 03), except for skipping subline numbers for prior year cost center(s) deleted in the current period or initially created cost center(s) no longer in existence after cost finding. Exceptions are specified in this manual. For Other (specify) lines, i.e., Worksheet settlement series, all subscripted lines should be in sequence and consecutively numbered beginning with subscripted line number 01. Automated systems should reorder these numbers where providers skip or delete a line in the series.

Drop all records with zero values from the file. Any record absent from a file is treated as if it were zero.

All numeric values are presumed positive. Leading minus signs may only appear in data with values less than zero that are specified in Table 3 with a usage of "-9". Amounts that are within preprinted parentheses on the worksheets, indicating the reduction of another number, are reported as positive values.

TABLE 5 - COST CENTER CODING

INSTRUCTIONS FOR PROGRAMMERS

Cost center coding is required because there are thousands of unique cost center names in use by providers. Many of these names are peculiar to the reporting provider and give no hint as to the actual function being reported. Using codes to standardize meanings makes practical data analysis possible. The method to accomplish this must be rigidly controlled to assure accuracy.

For any added cost center names (the preprinted cost center labels must be precoded), preparers must be presented with the allowable choices for that line or range of lines from the lists of standard and nonstandard descriptions. They then select a description that best matches their added label. The code associated with the matching description, including increments due to choosing the same description more than once, will then be appended to the user's label by the software.

Additional guidelines are:

- X Do not allow any pre-existing codes for the line to be carried over.
- X Do not precode all Other lines.
- X For cost centers, the order of choice must be standard first, then specific nonstandard, and finally the nonstandard AOther . . ."
- X For the nonstandard "Other . . .", prompt the preparers with, "Is this the most appropriate choice?," and then offer the chance to answer yes or to select another description.
- X Allow the preparers to invoke the cost center coding process again to make corrections.
- X For the preparers' review, provide a separate printed list showing their added cost center names on the left with the chosen standard or nonstandard descriptions and codes on the right.
- X On the screen next to the description, display the number of times the description can be selected on a given report, decreasing this number with each usage to show how many remain. The numbers are shown on the cost center tables.
- X Do not change standard cost center lines, descriptions and codes. The acceptable formats for these items are listed on page 29-521 of the Standard Cost Center Descriptions and Codes. The proper line number is the first two digits of the cost center code.

INSTRUCTIONS FOR PREPARERS

Coding of Cost Center Labels

Cost center coding standardized the meaning of cost center labels used by health care providers on the Medicare cost reporting forms. The use of this coding methodology allows providers to continue to use their labels for cost centers that have meaning within the individual institution.

The four digit codes that are required to be associated with each label provide standardized meaning for data analysis. Normally, it is necessary to code only added labels because the preprinted standard labels are automatically coded by CMS approved cost report software.

Additional cost center descriptions have been identified. These additional descriptions are hereafter referred to as the nonstandard labels. Included with the some nonstandard descriptions is an "Other . . ." designation to provide for situations where no match in meaning can be found. Refer to Worksheet A, line 9 or 21.

ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 222-92  
TABLE 5 - COST CENTER CODING

Both the standard and nonstandard cost center descriptions along with their cost center codes are shown on Table 5. The "use" column on that table indicates the number of times that a given code can be used on one cost report. You are required to compare your added label to the descriptions shown on the standard and nonstandard tables for purposes of selecting a code. Most CMS approved software provides an automated process to present you with the allowable choices for the line/column being coded and automatically associates the code for the selected matching description with your label.

#### Additional Guidelines

##### Categories

Make a selection from the proper category such as general service description for general service lines, special purpose cost center descriptions for special purpose cost center lines, etc.

##### Use of a Cost Center Coding Description More Than Once

Often a description from the "standard" or "nonstandard" tables applies to more than one of the labels being added or changed by the preparer. In the past, it was necessary to determine which code was to be used and then increment the code number upwards by one for each subsequent use. This was done to provide a unique code for each cost center label. Now, most approved software associate the proper code, including increments as required, once a matching description is selected. Remember to use your label. You are matching to CMS's description only for coding purposes.

##### Cost Center Coding and Line Restrictions

Use cost center codes only in designated lines in accordance with the classification of cost center(s), e.g., lines 58 through 60 may only contain cost center codes within the nonreimbursable services cost center category of both standard and nonstandard coding.

TABLE 6 - EDITS

Medicare cost reports submitted electronically must be subjected to various edits, which are divided into two categories: Level I and level II edits. These include mathematical accuracy edits, certain minimum file requirements, and other data edits. Any vendor software that produces an electronic cost report file for Medicare RHC/FQHCs must automate all of these edits. Failure to properly implement these edits may result in the suspension of a vendor's system certification until corrective action is taken. The vendor's software should provide meaningful error messages to notify the RHC/FQHC of the cause of every exception. The edit message generated by the vendor systems must contain the related 4 digit and 1 alpha character, where indicated, reject/edit code specified below. Any file containing a level I edit will be rejected by your fiscal intermediary without exception.

Level I edits (1000 series reject codes) test that the file conforms to processing specifications, identifying error conditions that would result in a cost report rejection. These edits also test for the presence of some critical data elements specified in Table 3. Level II edits (2000 series edit codes) identify potential inconsistencies and/or missing data items that may have exceptions and should not automatically cause a cost report rejection. Resolve these items and submit appropriate worksheets and/or data supporting the exceptions with the cost report. Failure to submit the appropriate data with your cost report may result in payments being withheld pending resolution of the issue(s).

The vendor requirements (above) and the edits (below) reduce both intermediary processing time and unnecessary rejections. Vendors should develop their programs to prevent their client RHC/FQHCs from generating either a hard copy substitute cost report or electronic cost report file where level I edits exist. Ample warnings should be given to the provider where level II edit conditions are violated.

**NOTE:** Dates in brackets [ ] at the end of an edit indicate the effective date of that edit for cost reporting periods ending on or after that date. Dates followed by a "b" are for cost reporting periods beginning on or after the specified date. Dates followed by an "s" are for services rendered on or after the specified date unless otherwise noted. [3/31/2005]

I. Level I Edits (Minimum File Requirements)

<u>Reject Code</u>	<u>Condition</u>
1000	The first digit of every record must be either 1, 2, 3, or 4 (encryption code only). [3/31/2005]
1005	No record may exceed 60 characters. [3/31/2005]
1010	All alpha characters must be in upper case. This is exclusive of the encryption code, type 4 record, record numbers 1, 1.01, and 1.02. [3/31/2005]
1015	For micro systems, the end of record indicator must be a carriage return and line feed, in that sequence. [3/31/2005]
1020	The independent RHC/FQHC facility provider number (record #1, positions 17-22) must be valid and numeric (issued by the applicable certifying agency and falls within the specified range). [3/31/2005]
1025	All dates (record #1, positions 23-29, 30-36, 45-51, and 52-58) must be in Julian format and legitimate. [3/31/2005]
1030	The fiscal year beginning date (record #1, positions 23-29) must be less than the fiscal year ending date (record #1, positions 30-36). [3/31/2005]

TABLE 6 – EDITS

<u>Reject Code</u>	<u>Condition</u>
1035	The vendor code (record #1, positions 38-40) must be a valid code. [3/31/2005]
1050	The type 1 record #1 must be correct and the first record in the file. [3/31/2005]
1055	All record identifiers (positions 1-20) must be unique. [3/31/2005]
1060	Only a Y or N is valid for fields which require a Yes/No response. [3/31/2005]
1075	Cost center integrity must be maintained throughout the cost report. For subscripted lines, the relative position must be consistent throughout the cost report. [3/31/2005]
1080	For every line used on Worksheet A, there must be a corresponding type 2 record. [3/31/2005]
1090	Fields requiring numeric data (charges, treatments, costs, FTEs, etc.) may not contain any alpha character. [3/31/2005]
1100	In all cases where the file includes both a total and the parts that comprise that total, each total must equal the sum of its parts. [3/31/2005]
1005S	The cost report ending date (Worksheet S, Part I, column 2, line 4) must be on or after March 31, 2005. [3/31/2005]
1015S	The cost report period beginning date (Worksheet S, Part I, column 1, line 4) must precede the cost report ending date (Worksheet S, Part I, column 2, line 4). [3/31/2005]
1020S	The independent RHC/FQHC facility name, address, provider number, and certification date (Worksheet S, line 1, column 1(name); line 1.01, column 1 (street address); line 1.02, columns 1 (city), 2 (State), and 3 (ZIP code); line 1.03, column 1 (county); line 2, column 1 (provider number); and line 5, column 4 (certification date), respectively) must be present and valid. [3/31/2005]
1025S	If the response to Worksheet S, Part I, line 14, column 1 is “Y”, then the facility name, address, provider number, designation (applicable for FQHCs only, (Worksheet S, Part I, line 5, column 3 = “2”)), and certification date (Worksheet S, Part III, line 1, column 1; line 2, column 1; line 3, columns 1, 2, and 3; line 4, column 1; line 5, column 1; and line 6, columns 1 and 2, respectively) must be present and valid. [3/31/2005]
1030S	If the response to Worksheet S, Part I, line 14, column 1 is “Y”, then Worksheet S, Part I, line 14, column 2 must be greater than 0 (zero), but if Worksheet S, Part I, line 14, column 1 is “N”, then Worksheet S, Part I, line 14, column 2 must equal 0 (zero). Additionally, if line 14, column 2, is greater than zero, this number must reflect the number of consolidated facilities (Worksheet S, part III), excluding the main provider. [12/31/2006]
1000A	All amounts reported on Worksheet A, columns 1-2, line 62, must be greater than or equal to zero. [3/31/2005]
1020A	For reclassifications reported on Worksheet A-1 the sum of all increases (column 4) must equal the sum of all decreases (column 7). [3/31/2005]

1025A	For each line on Worksheet A-1, if there is an entry in columns 3, 4, 6, or 7, there must be an entry in column 1. There must be an entry on each line of column 4 for each entry in column 3 (and vice versa), and there must be an entry on each line of column 7 for each entry in column 6 (and vice versa). [3/31/2005]																
1040A	For Worksheet A-2 adjustments on lines 1-5, and 7-10, if either columns 2 or 4 has an entry, then both columns 2 and 4 must have entries, and if any one of columns 0, 1, 2, or 4 for line 11 and subscripts thereof has an entry, then all columns 0, 1, 2, and 4 must have entries. Only valid line numbers may be used in column 4. [3/31/2005]																
1045A	If there are any transactions with related organizations as defined in CMS Pub. 15-I, chapter 10 (Worksheet A-2-1, Part I, column 1, line 1 is "Y"), Worksheet A-2-1, Part II, columns 4 or 5, sum of lines 1-4 must be greater than zero; and Part C, column 1, any one of lines 1-4 must contain any one of alpha characters A through G. II. Level II Edits (Potential Rejection Errors)

These conditions are usually, but not always, incorrect. These edit errors should be cleared when possible through the cost report. When corrections on the cost report are not feasible, provide additional information in schedules, note form, or any other manner as may be required by your fiscal intermediary (FI). Failure to clear these errors in a timely fashion, as determined by your FI, may be grounds for withholding payments.

<u>Edit</u>	<u>Condition</u>
2000	All type 3 records with numeric fields and a positive usage must have values equal to or greater than zero (supporting documentation may be required for negative amounts). [3/31/2005]
2005	Only elements set forth in Table 3, with subscripts as appropriate, are required in the file. [3/31/2005]
2010	The cost center codes (positions 21-24) (type 2 records) must be a code from Table 5, and each cost center code must be unique. [3/31/2005]
2015	Standard cost center lines, descriptions, and codes should not be changed. (See Table 5.) This edit applies to the standard line only and not subscripts of that code. [3/31/2005]
2020	All standard cost center codes must be entered on the designated standard cost center line and subscripts thereof as indicated in Table 5. [3/31/2005]
2025	Only nonstandard cost center codes within a cost center category may be placed on standard cost center lines of that cost center category. [3/31/2005]
2030	The standard cost centers listed below must be reported on the lines as indicated and the corresponding cost center codes may only appear on the lines as indicated. No other cost center codes may be placed on these lines or subscripts of these lines, unless indicated herein. [3/31/2005]
