SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden

(time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 et seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

Two construction standards, "Medical Services and First Aid" (§ 1926.50), and "General Requirements for Storage" (§ 1926.250), contain posting provisions. Paragraph (f) of § 1926.50 requires employers to conspicuously post emergency telephone numbers for physicians, hospitals, or ambulances at their worksites if 911 emergency telephone service is not locally available; in the event that a worker has a serious injury at a worksite, this posting requirement helps expedite emergency medical treatment of the worker. Paragraph (a)(2) of § 1926.250 specifies that employers must post the maximum safe load limits of floors located in storage areas inside buildings or other structures under construction, unless the floors or slabs are on grade (sitting on the ground). This provision prohibits employers from overloading floors in areas used to store material and equipment where a structure's floors are not supported directly by the ground. This requirement is intended to prevent floor collapses which could seriously injure or kill workers.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other

technological information collection, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the two construction standards, "Medical Services and First Aid" paragraph (f) of § 1926.50, and "General Requirements for Storage" paragraph (a)(2) of § 1926.250. The Agency is proposing an adjustment decrease of its current burden hour estimate from 139,078 burden hours to 105,935 burden hours for a total decrease of 33,143 burden hours associated with these two standards. The reduction results from an estimated decrease in the number of affected construction projects. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Construction Standards on the Posting of Emergency Telephone Numbers and Floor Load Limits (29 CFR 1926.50 and 29 CFR 1926.250).

OMB Control Number: 1218–0093. Affected Public: Business or other forprofits.

Number of Respondents: 428,609. Number of Responses: 428,609. Frequency of Responses: On occasion.

Average Time per Response: Varies from 2 minutes (.03 hour) to post emergency telephone numbers to 15 minutes (.25 hour) to develop and post load limits for floors.

Estimated Total Burden Hours: 105,935.

Estimated Cost (Operation and Maintenance): \$0.
