

EPA/Delegated Tribes FTE

5/29/2014

FTE Estimate	
0.45	Registration
0.70	Misc approvals & oversight related to reporting & recordkeeping
0.50	Non-Title V operating permits
2.75	Nez Perce Burn Permit Program
1.00	Umatilla Burn Permit Program
0.20	Database Development
0.10	Delegations
5.70	TOTAL

Small Entity Estimates

Rule #	Estimated # of Respondents	Estimated # of Small Entities	Comments
49.122	7	7	Assumed all Tribal governments were small entities.
49.126	111	94	Assumed all the simple sources and construction sources were small entities.
49.130	102	90	Assumed all but T5 sources were small entities.
49.131	3	3	Assumed all were small entities.
49.132	863	863	For small open burns (individuals), assumed all were small entities.
49.132	177	150	For large open burns (farms and businesses), assumed 85%* were small entities.
49.133	200	170	Assumed 85%* of farms were small entities.
49.134	15	8	For Governmental entities, assumed 50% were federal (large) and 50% were tribal (small).
49.134	10	8	For logging industry businesses, assumed 75% were small entities.
49.138	158	146	Assumed all but T5 sources were small entities.
49.139	35	7	These sources are generally large enough to be major sources, therefore we assumed only 20% were small entities.

* For farms, we used the 2002 Census of Agriculture data for Idaho and Oregon to estimate the number of farms that are considered small entities (less than \$750,000 average annual receipts). We calculated approx. 89% of farms are small entities for Oregon and 81% for Idaho, so we used an average of 85% overall for our estimates.
