

We are conducting a national evaluation of the implementation of Safe Schools/Healthy Students (SS/HS) programs. This evaluation will help improve the implementation and provision of mental health services in schools and communities. You have been identified based on your involvement in the provision of SS/HS programs within your agency. Because of your position in this program, we would like to ask if you would be willing to participate in a short survey regarding the implementation of your SS/HS program.

The survey includes questions about developing and implementing evidence based services for children and youth as part of the federal grant, as well as any successes and challenges to the effective provision of services, and recent efforts to improve the coordination of services and collaborations among schools, communities and families. The survey will take approximately 25 minutes to complete and can be completed online by following the link provided below in this email. All data obtained from this survey will be kept confidential and will only be reported in an aggregate format. No names will be collected, nor will any identifying information be associated with your responses. Participation in this study is completely voluntary and you will have the right to stop the survey at any time or refuse to participate entirely.

If you think you are interested in participating in this study, please follow the link below. A full description of the study and your rights as a participant will be provided on this page.
