

## **MSSICS SCREEN PRINTS FOR**

**OMB # 0960-0174**

**SSA-8006-F4**

The following are screen prints from the Modernized SSI Claim System (MSSICS) that collect information that is equivalent to the paper form SSA-8006-F4. Like the SSA-8006-F4, these MSSICS screens collect information that is needed to establish whether the SSI beneficiary lives in his or her own household or lives in another person's household. Like the SSA-8006-F4, these screens also collect information that is needed to determine if the SSI beneficiary receives in-kind support and maintenance from inside the household, from outside the household, or does not receive any in-kind support and maintenance.

### **LXHP Screens (Householder In-Kind Support and Maintenance/Cash Income)**

The LXHP screens collect information to determine in-kind support and maintenance when an SSI beneficiary is considered to be living in his or her own household and has roommates who contribute to paying the household's expenses.

### **LOHH Screens (In-Kind Support and Maintenance Provided in the Household of Another)**

The LOHH screens collect information to determine in-kind support and maintenance when an SSI beneficiary lives in the household of another and may be receiving food and shelter paid for by the other members of the household.

### **LISM Screens (In-Kind Support and Maintenance Received from Outside the Household)**

The LISM screens collect information to determine whether the SSI beneficiary is getting in-kind support and maintenance because the beneficiary gets food or shelter provided by third parties outside the household.
