SUPPLEMENTARY INFORMATION:

Title: OCS Net Profit Share Payment Reporting—30 CFR part 1220.

OMB Control Number: 1012-0009.

Bureau Form Number: None.

Abstract: The Secretary of the U.S. Department of the Interior is responsible for collecting royalties from lessees who produce minerals from leased Federal and Indian lands and the Outer Continental Shelf (OCS). Under various laws, the Secretary's responsibility is to manage mineral resources production on Federal and Indian lands and the OCS, collect the royalties and other mineral revenues due, and distribute the funds collected under those laws. ONRR performs the royalty management functions and assists the Secretary in carrying out the Department's responsibility. Public laws pertaining to mineral leases on Federal and Indian lands and the OCS are posted at http://www.onrr.gov/Laws_R_D/PublicLaws.htm.

I. General Information

ONRR collects and uses this information to determine all allowable direct and allocable joint costs and credits under § 1220.011 incurred during the lease term, appropriate overhead allowance permitted on these costs under § 1220.012, and allowances for capital recovery calculated under § 1220.020. ONRR also collects this information to ensure royalties or net profit share payments are accurately valued and appropriately paid. This ICR affects only oil and gas leases on submerged Federal lands on the OCS.

II. Information Collections

Title 30 CFR part 1220 covers the net profit share lease (NPSL) program and establishes reporting requirements for determining the net profit share base under § 1220.021 and calculating net profit share payments due the Federal Government for the production of oil and gas from leases under § 1220.022.

A. NPSL Bidding System

To encourage exploration and development of oil and gas leases on submerged Federal lands on the Outer Continental Shelf (OCS), the Bureau of Ocean Energy Management, promulgated regulations at 30 CFR part 260—Outer Continental Shelf Oil and Gas Leasing. Also, BOEM promulgated specific implementing regulations for the NPSL bidding system at § 260.110(d). BOEM established the NPSL bidding system to balance a fair market return to the Federal Government for the lease of its public lands with a fair profit to companies risking their investment capital. The system provides an incentive for early and expeditious exploration and development and provides for sharing the risks by the lessee and the Federal Government. The NPSL bidding system incorporates a fixed capital recovery system as a means through which the lessee recovers costs of exploration and development from production revenues, along with a reasonable return on investment.

B. NPSL Capital Account

The Federal Government does not receive a profit share payment from an

NPSL until the lessee shows a credit balance in its capital account; that is, cumulative revenues and other credits exceed cumulative costs. Lessees multiply the credit balance by the net profit share rate (30 to 50 percent), resulting in the amount of net profit share payment due the Federal Government.

ONRR requires lessees to maintain an NPSL capital account for each lease under § 1220.010, which transfers to a new owner when sold. Following the cessation of production, lessees are also required to provide either an annual or a monthly report to the Federal Government, using data from the capital account until the lease is terminated, expired, or relinquished.

C. NPSL Inventories

The NPSL lessees must notify the BOEM of their intent to take inventory so the BOEM Director may be represented at the taking of inventory under 1220.032. Each lessee must file a report after each inventory is taken, reporting the controllable material under § 1220.031.

D. NPSL Audits

When non-operators of an NPSL call for an audit, they must notify ONRR. When ONRR calls for an audit, the lessee must notify all non-operators on the lease. These requirements are located at § 1220.033.

III. OMB Approval

The information we collect under this ICR is essential in order to determine when net profit share payments are due

and to ensure lessees properly value and pay royalties or net profit share payments.

We are requesting OMB approval to continue to collect this information. Not collecting this information would limit the Secretary’s ability to discharge fiduciary duties and may also result in the inability to confirm the accurate royalty value. Proprietary information submitted to ONRR under this collection is protected, and no items of a sensitive nature are included in this information collection.

Frequency: Annually, monthly, and on occasion.

Estimated Number and Description of Respondents: 14 lessees.

Estimated Annual Reporting and Recordkeeping “Hour” Burden: 2,451 hours.

All fourteen lessees report monthly because all current NPSLs are in producing status. Because the requirements for establishment of capital accounts at § 1220.010(a) and capital account annual reporting at § 1220.031(a) are necessary only during non-producing status of a lease, we included only one response annually for these requirements, in case a new NPSL is established. We have not included in our estimates certain requirements performed in the normal course of business, which are considered usual and customary. The following table shows the estimated annual burden hours by CFR section and paragraph.

7. In the event modifications are made in the form of a proposed contract, the appropriate regional director shall determine whether republication of the notice and/or extension of the comment period is necessary.

Factors considered in making such a determination shall include, but are not limited to, (i) the significance of the modification, and (ii) the degree of public interest which has been expressed over the course of the negotiations. At a minimum, the regional director will furnish revised contracts to all parties who requested the contract in response to the initial public notice.
