Supporting Statement Importation of Fresh Bananas from the Philippines Into Hawaii and U.S. Territories OMB No. 0579-0415

A. Justification

1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection.

The United States Department of Agriculture (USDA), Animal and Plant Health Inspection Service (APHIS), is responsible for preventing plant pests and noxious weeds from entering the United States, preventing the spread of plant diseases not widely distributed in the United States, and eradicating those imported pests when eradication is feasible.

Under the Plant Protection Act (7 U.S.C. 7701 <u>et seq.</u>), the Secretary of Agriculture is authorized to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pests new to the United States or not known to be widely distributed throughout the United States.

The regulations in "Subpart-Fruits and Vegetables" (7 CFR 319.56, referred to as the regulations) prohibit or restrict the importation of fruits and vegetables into the United States from certain parts of the world to prevent the introduction and dissemination of plant pests that are new to or not widely distributed within the United States.

APHIS amended the regulations concerning the importation of fruits and vegetables to allow the importation of fresh bananas from the Philippines into Hawaii and U.S. Territories. As a condition of entry, the bananas will have to be produced in accordance with a systems approach that will include requirements for importation of commercial consignments, monitoring of fruit flies to establish low-prevalence places of production, harvesting only of hard green bananas, and inspection for quarantine pests by the National Plant Protection Organization of the Philippines. The bananas will also have to be accompanied by a phytosanitary certificate with an additional declaration stating that they are grown, packed, inspected and found to be free of quarantine pests in accordance with all requirements. This action will allow the importation of bananas from the Philippines while continuing to protect against the introduction of plant pests into the United States.

APHIS is asking the Office of Management and Budget (OMB) to approve, for 3 years, its use of these information collection activities associated with its efforts to prevent the spread of plant pests and plant diseases into the United States.

2. Indicate how, by whom, and for what purpose the information is used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.

APHIS will use the following information activities to allow the import of fresh bananas from the Philippines into Hawaii and U.S. Territories in accordance with the requirements which will restrict any plant pests from entering the United States:

<u>Bilateral Workplan</u> – The NPPO of the Philippines will be required to provide a workplan to APHIS that details activities that the NPPO of the Philippines will carry out, subject to APHIS' approval of the workplan, to meet the requirements of new section §319.56-58.

Registration of Production Site – Packinghouse production sites will be required to register with the NPPO of the Philippines meeting the requirements of new section § 319.56-58(a)(2).

Monitoring and Oversight that Includes Training – The NPPO of the Philippines must visit and inspect registered places of production monthly, starting at least 3 months before harvest begins and continuing through the end of the shipping season to verify that the growers are complying with the requirements of this section (§ 319.56-58(b)) and follow pest control guidelines, when necessary, to reduce quarantine pest populations.

Maintain All Forms and Documents That Include Fruit Fly Detections and Updating Records — The NPPO of the Philippines must keep records of fruit fly detections for each trap, update the records each time the traps are checked, and make the records available to an APHIS inspector upon request. If, after 2 years of export inspections of banana fruit, Bactrocera spp. larvae have not been found in the banana export program, further fruit fly trapping will not be required. Records are required to be kept 2 years.

<u>Marking of Production Site W/Registration Number</u> – Harvested bananas will have to be placed in field cartons or containers that are marked with the official registration number of the place of production. The place of production where the bananas were grown will have to remain identifiable when the fruit leaves the grove, at the packinghouse, and throughout the export process. These requirements will ensure that APHIS and the NPPO of the Philippines can identify the place of production where the bananas were produced if inspectors find quarantine pests in the fruit either before export or at the port of entry.

Phytosanitary Certificate w/ **Declaration** – Each consignment of fruit must be accompanied by a phytosanitary certificate with an additional declaration issued by the NPPO of the Philippines stating that the bananas in the consignment were grown, packed, and inspected and found to be free of pests in accordance with the requirements of new section § 319.56-58.

3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other forms of information technology, e.g., permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also, describe any consideration of using information technology to reduce burden.

APHIS has no control over the automation of foreign forms.

4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purpose described in item 2 above.

The information APHIS collects is exclusive to its mission of preventing the entry of injurious plant pests, diseases, and noxious weeds and is not available from any other source.

5. If the collection of information impacts small businesses or other small entities, describe any methods used to minimize burden.

The information APHIS collects in connection with its program is the minimum needed to protect the United States from plant pests and diseases entering into the United States. APHIS estimates that approximately 100 percent of the total number of respondents are small entities.

6. Describe the consequences to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.

Failing to collect this information would cripple APHIS' ability to ensure that bananas from the Philippines are not carrying plant pests. If plant pests (such as *Bactrocera cucurbitae* and *Conogethes punctiferalis*) were introduced into the United States, growers would suffer hundreds of millions of dollars in losses.

- 7. Explain any special circumstances that require the collection to be conducted in a manner inconsistent with the general information collection guidelines in 5 CFR 1320.5.
 - requiring respondents to report information to the agency more often than quarterly;
 - requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;
 - requiring respondents to submit more than an original and two copies of any document;
 - requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records for more than three years;

- in connection with a statistical survey, that is not designed to produce valid and reliable results that can be generalized to the universe of study;
- requiring the use of statistical data classification that has not been reviewed and approved by OMB.
- that includes a pledge of confidentiality that is not supported by authority established in statue or regulation, that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or
- requiring respondents to submit proprietary trade secret, or other confidential information unless the agency can demonstrate that it has instituted procedures to protect the information's confidentiality to the extent permitted by law,

No special circumstances exist that would require this collection to be conducted in a manner inconsistent with the general information collection guidelines in 5 CFR 1320.5.

8. Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and recordkeeping, disclosure, or reporting form, and on the data elements to be recorded, disclosed, or reported. If applicable, provide a copy and identify the date and page number of publication in the Federal Register of the agency's notice, soliciting comments on the information collection prior to submission to OMB.

In 2013-2014, APHIS held productive consultations with the following individuals concerning the information collection activities associated with importing fresh bananas from the Philippines into Hawaii and U.S. Territories:

DB-11.01 ANFLO Banana Corporation BRGY, Napnapan, Pantukan, Compostela Valley Province

Lapanday Foods Corporation Maryknoll Drive Brgy Pampanga, Davao City

Diamong Farms, Inc Somoso Comp. Sto. Nino, Panaba City DDN

APHIS' proposed rule (Docket No. APHIS 2013-0045) was published in the Federal register on Tuesday, January 28, 2014, with a 60-day comment period. During that time, APHIS received 46 comments from interested members of the public, all of which are addressed in the Final Rule. Three comments are in favor of the rule, and the other comments are addressed, by topic, including: Monitoring and Oversight, Inspection, Pest Risk, Risk Mitigations, Fruit Fly Mitigations, Bagging Requirements, Post-Harvest Processing, Phytosanitary Certificates, and Economic Analysis. For reasons given in the Proposed and Final Rules, the Proposed Rule is being adopted as the Final Rule, without change.

9. Explain any decisions to provide any payment or gift to respondents, other than renumeration of contractors or grantees.

This information collection activity involves no payments (other than appropriate, program-related payments) or gifts to respondents.

10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.

No additional assurance of confidentiality is provided with this information collection. Any and all information obtained in this collection shall not be disclosed except in accordance with 5 U.S.C. 552a.

11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and others that are considered private. This justification should include the reasons why the agency considers the questions necessary, the specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.

This information collection activity asks no questions of a personal or sensitive nature.

- 12. Provide estimates of the hour burden of the collection of information. Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated.
- Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. If this request for approval covers more than one form, provide separate hour burden estimates for each form and aggregate the hour burdens in Item 13 of OMB Form 83-I.

See APHIS Form 71 for hour burden estimates.

• Provide estimates of annualized cost to respondents for the burden hours for this collection of information, identifying and using appropriate wage rate categories.

192 hours X \$15 average hourly wage = \$2,880 estimated annual cost

APHIS arrived at this figure by multiplying the total burden hours by the estimated average hourly wage of the above respondents.

The hourly rate is an average salary of growers and foreign officials based on historical data and conversations between PPQ Program Specialists, APHIS' International Services, and plant authorities in the Philippines.

13. Provide estimates of the total annual cost burden to respondents or recordkeepers resulting from the collection of information, (do not include the cost of any hour burden shown in items 12 and 14). The cost estimates should be split into two components: (a) a total capital and start-up cost component annualized over its expected useful life; and (b) a total operation and maintenance and purchase of services component.

There is zero annual cost burden associated with capital and start-up costs, maintenance costs, and purchase of services in connection with this program.

14. Provide estimates of annualized cost to the Federal government. Provide a description of the method used to estimate cost and any other expense that would not have been incurred without this collection of information.

The estimated cost to the Federal Government is \$944. (See APHIS Form 79)

15. Explain the reasons for any program changes or adjustments reported in Items 13 or 14 of the OMB Form 83-1.

This is a new program.

16. For collections of information whose results are planned to be published, outline plans for tabulation and publication.

APHIS has no plans to tabulate or publish the information collected.

17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.

There are no USDA forms in this information collection.

18. Explain each exception to the certification statement identified in the "Certification for Paperwork Reduction Act."

APHIS is able to certify compliance with all of the provisions in the Act.

B. Collections of Information Employing Statistical Methods

Statistical methods are not used in this information collection.
