Attachment G. IRB Letter

Centers for Disease Control and Prevention

Memorandum

Date:

September 4, 2013

From:

Mary Kathleen Glynn, DVM, MPVM

Associate Director for Science

Division of Scientific Education and Professional Development (proposed) Center for Surveillance, Epidemiology and Laboratory Services (proposed)

Office of Public Health Scientific Services (proposed)

Subject:

Generic Emergency Epidemic Investigation Data Collections

To:

Leroy A. Richardson, MS, MPH, MSCJ, CPHA Chief, Information Collection Review Office

Office of Scientific Integrity

Office of the Associate Director for Science

Office of the Director

Based on the description and justification for the Generic Emergency Epidemic Investigations (EEIs) activities and on the definition of research defined by the Federal Policy for the Protection of Human Subjects (45 CFR 46), IRB approval generally is not required for EEIs. These investigations usually are considered responses to public health emergencies and not research based on the definition provided by 45 CFR 46. For individual investigations, the appropriate CDC and local health authority Human Subjects Review contact are consulted for an official research determination.

Should there be any questions regarding this determination; feel free to contact me at 404-498-6169 or mjg6@cdc.gov.
