Burden Memo for the Generic Clearance of Emergency Epidemic Investigation Data Collections (0920-1011)

GenIC No.:	2014003-XXX					
EPI AID No. (if applicable):	NA					
Requesting entity (e.g.,	Georgia Department of Public Health					
jurisdiction):						
Title of Investigation:	Contact Investigation of Travelers Potentially Exposed to Middle East Respiratory					
	Syndrome Coronavirus (MERS-CoV) during Air Travel					
Purpose of Investigation: (Use	Middle East Respiratory Syndrome (MERS) is viral respiratory illness first reported in					
as much space as necessary)	Saudi Arabia in 2012. It is caused by a coronavirus called MERS-CoV. Most people					
	who have been confirmed to have MERS-CoV infection developed severe acute respiratory illness. They had fever, cough, and shortness of breath. About 30% of these					
	people died. A second imported case of MERS in the United States, identified in a					
	traveler, was reported to CDC by the Florida Department of Health on May 11, 2014,					
	and confirmed by CDC on May 11. On May 1, the patient traveled by commercial					
	airline from Saudi Arabia to the UK, then UK to Boston, Massachusetts; then Boston to					
	Atlanta, Georgia; and then Atlanta to Orlando, Florida. The traveler was a health-care					
	provider in Saudi Arabia and traveled while symptomatic and potentially contagious. Little is known about the modes of transmission of MERS-CoV and the risks of					
	acquiring infection from contact with an infected person, either in the community or					
	household setting or on conveyances such as planes, buses or trains. Many of the					
	contacts on the Boston to Atlanta leg of the journey ended their travel in Georgia. The					
	Georgia Department of Health has requested CDC assistance in doing a contact					
	investigation to identify those passengers and notify them about the possible exposure.					
	This will include collecting information about any symptoms related to MERS-CoV infection and collection of appropriate biological specimen to test for MERS-CoV.					
Duration of Data Collection:						
Date Began:	5/23/2014					
Date Ended:	7/29/2014					
Lead Investigator						
Name:	Nicki Pesik					
CIO/Division/Branch:	NCEZID/DGMQ/Quarantine and Border Health Services Branch					
Complete the following for e	each instrument used during the investigation.					
Data Collection Instrument						
Name of Data Collection Instru	ment: MERS-CoV_Questionnaire for Passengers and Crew					
Type of Respondent						
🖂 General public 🛛 🗌	Healthcare staff 🛛 Laboratory staff 🖄 Patients 🗔 Restaurant staff					
Other: (describe) Ai	rline passengers and staff					
Data Collection Methods (che						
Epidemiologic Study	(indicate which type(s) below)					
Descriptive Study						
	related to the exposure of passengers or crew on air or land conveyances					
	or community, household or community contacts in order to assess					
	factors related to transmission. Contact investigation data analyzed to					
	determine the occurrence and extent of MERS-CoV transmission among					
	case contacts, to identify risk factors for transmission, and to implement immediate control measures for any new infectious cases identified.					
	Characterization of MERS-CoV transmission also used to inform public					
	health prevention and control recommendations for travel restriction					
	among persons with symptoms consistent with MERS-CoV.					
Cross-sectional St	udy (describe):					
Cohort Study (des	cribe):					
Case-Control Stud	ly (describe):					

Burden Memo for the Generic Clearance of Emergency Epidemic Investigation Data Collections (0920-1011)

Other (describe):				
Other (describe):				
Environmental Assessment (describe):	Direct for emits, and convolutions to the second se			
Laboratory Testing (describe):	Blood for acute- and convalescent-phase sera among all contacts and possibly for PCR among asymptomatic persons. Oral and nasopharyngeal swabs and other appropriate samples for MERS-CoV testing among symptomatic contacts.			
Other (describe):				
Data Collection Mode (check all that apply)				
Survey Mode (indicate which mode(s) be	elow):			
Face-to-face Interview (describe):				
Telephone Interview (describe):	Identified contacts interviewed by telephone to assess information about flight/travel, travel companions, and health status.			
Self-administered Paper-and-
