Subject: Nonsubstantive Change – Permanency Innovative Initiative

The PII Implementation Study was approved on 8/17/2012, OMB No. 0970-0408, expires 8/31/2015. The Implementation Study included a case study protocol, approved as part of that package.

Request. We would like to request approval for non-substantive revisions to the case study protocol. The revisions involve revised questions to support an analysis of the costs of implementing and operating the PII interventions.

Specifics.

Section C: Resources

Changes requested within Section C include rewording, reorganizing and deletion of previously approved questions. No additional questions were added to this section. Some questions were removed, as they were deemed no longer necessary.

See the attached case study protocol.

- Revised questions C.2-10 pertain to the grantee costs

Note. These changes will not add burden. Consequently, the burden table in Supporting Statement A does not need to be changed, and therefore, the SSA is not included in this non-substantive change request.
