Section 1. Respondent Background

I would like to start by learning a little bit about you and your family to help understand the information we gather. In particular, for some of the questions I will be asking, it would be helpful for me to understand a little bit about the history of your relationship with your current partner, how many children you have and who your children live with most of the time.

[PROBE IF NEEDED]

- What do you call your current partner?
- How long have you and your partner been together?
- Do you and your partner live together?

Later in the interview, some questions will refer to this parent. So that I can be sure I'm referring to the right person, can you tell me his/her first name? You can also use a nickname or initials.

Section 2. Cognitive Interviewing Instructions

I work for an organization, Child Trends, and we have been hired to help develop survey questions that can be used to evaluate outcomes for parents who participate in Healthy Marriage and Relationship Education Programs. The goal of these programs is to help strengthen couple and family relationships. We are glad to have your input on whether these questions might be good ones to ask parents in diverse types of families. Your answers will be used to help develop the questions the programs could use to find out if their program is working well for their participants. We want to find out what you think about the questions because we want to make sure that they are clear. For some of the questions, we will be asking you to think about whether the questions make sense for complex or blended families, which include parents that have children together, but may also have children from previous relationships, either living with them or in other households.

After you answer each question, I will have some follow-up questions to find out why you answered the way you did or what a certain word or phrase meant to you. I may ask you about different ways to ask the question. Remember that there are not right or wrong answers to my questions -- we just want your honest reactions and opinions.

So that we get the most from your help, it is important that you tell me if something in the question does not make sense to you or seems weird to you in any way. Please tell me if:

- a question is hard to answer,
- the words in a question are hard to understand,
- you have a hard time coming up with an answer,
- the words in the question are not the ones that you would use,
- you think other parents may not understand,
- you can't answer a question or it's hard for you to answer for some other reason.

Do you have any questions?
