TLP Program Overview Survey

Thank you for taking the time to complete this survey. This survey is intended for research purposes **ONLY**. The information you share will help us to better understand how TLPs work with youth. The information reported is strictly confidential and will in no way affect HHS's view of your program's performance. The responses to the survey will be kept anonymous: neither the respondent nor the agency will be identified by name when we report findings from the study.

The TLP Objectives Program Survey is designed to gather information about your TLP program, such as who it serves, how it is structured, and what services it provides. TLP programs differ with regard to how they are funded and structured. In some cases, an agency's FYSB TLP grant covers the entire cost of the program. In others, agencies combine multiple sources of funding to support their program, with FYSB funding used to cover a portion of the program's beds, units, or services. In this survey, we want to understand the design and functioning of the **program as a whole**, not just those beds or services funded through your FYSB TLP grant.
