1. If different from the Notice of Intent and Authorization to Conduct Oil and Gas Geophysical Exploration Operations (NOI), show the lands, line locations, shot points, and routes that you actually used for geophysical activities. To depict any deviations from what you had proposed in the approved NOI, we recommend a PDF version of a 7 1/2-minute USGS quadrangle or the USGS map scale commonly used in the area along with GIS data in a locally projected Universal Transverse Mercator (UTM) North American Datum (NAD) 1983 ESRI shape file or geodatabase format (e.g., UTM zone 13N NAD83). For seismic operations, your maps and GIS data must include the locations of operations and facilities planned in the NOI; and clearly attributed, the actual access routes to and within the project area, source and receiver point locations and lines, and shot point locations used in your geophysical operations where they deviate from those proposed in the NOI. The map and data must also include surface ownership and any Federal lands under lease. Explain deviations from the original NOI.

2. Miles of source line or acres of survey on: a. Your Lease b. Other Federal lands

3. Describe how you plugged any shot holes.

4. If the Bureau of Land Management (BLM) or the Forest Service (FS) requests it, attach a copy of the "Hole Plugging Log" describing each shot hole, including whether holes were wet or dry, the static water level, flowing holes, breached or caved holes, or lost hole locations.

5. Describe any surface disturbance, its location, and how you reclaimed it.
