

Justification for Nonsubstantive, No-material Change Request

EBSA hereby requests OMB approval for a no material/nonsubstantive change to its “Focus Groups and Survey Regarding Pension Benefit Statements” information collection request (1210-0151). The Department and its contractor, RAND, conducted focus group testing on the survey instrument and sample statements in July 2014. Based on feedback received during the focus group testing, the Department and RAND made refinements to the survey instrument and sample statements to improve the clarity of questions and/or response categories and survey flow. No material or substantive changes were made to the documents. A detailed description of the individual refinements can be found under “Supplementary Documents” in ROCIS.
