<p>The Trends in Mathematics and Science Study (TIMSS) is an international assessment of fourth and eighth grade students' achievement in mathematics and science. Since its inception in 1995, TIMSS has continued to assess students every 4 years (1995, 1999, 2003, 2007, 2011). Participation in this study provides data on current and past education policies and a comparison of U.S. education policies with its international counterparts. Periodically, TIMSS has also conducted an assessment of advanced mathematics and physics of students at the end of secondary school (1995 and 2008). The United States participated in TIMSS Advanced in 1995, but not in 2008. Because of the current strong policy interest in preparedness for college and for careers in science, technology, engineering, and mathematics (STEM) fields, the U.S. plans to participate in TIMSS Advanced in 2015. The materials, procedures, and respondent burden for the 2015 TIMSS and TIMSS Advanced main study data collection that will take place in March-May, 2015, were approved in September 2014 (OMB# 1850-0695 v.5). This submission updates the OMB# 1850-0695 v.5 clearance package with the final versions of grades 4, 8, and 12 questionnaires.</p>
